

In this context, the Group's Integrated Risk Management System ('IRMS') is based on the Risk Management and Control Policy, which sets out the basic principles, key risk factors and the general framework for risk management and control.

The Risk Management and Control Policy is implemented and complemented by specific policies and internal regulations relating to certain units or areas of the Group. The policies and internal regulations developed and implemented by these areas for the management of the different types of risks include: the Financial Risk Management Policy, the Code of Conduct and Responsible Practices, the Code of Conduct for Manufacturers and Suppliers, the Criminal Risk Prevention Policy, the Sustainability Policy, the Information Security Policy, the Policy on Human Rights, the Diversity and Inclusion Policy, the Compliance Policy, and the Anti-Money Laundering and Terrorist Financing Policy, among others.

For more details, see section 6.3 Responsible risk management of the Statement on Non-Financial Information.

Significant events after the reporting period

Turkey is under the effects of the catastrophic earthquakes that have been occurring since February 6, 2023. Despite the fact that some of the factories of the Turkish supplier cluster are concentrated in the area affected by the earthquakes, the impact on the Group's global supply chain is not relevant, and both our and our supplier's operations in the affected area tend to normalize.

Information on the outlook for the Group

Spring/Summer 2023 collections have been very well received by our customers. Store and online sales in constant currency between 1 February and 13 March 2023 increased 13.5% versus the same period in 2022.

Adjusting for the operations in the Russian Federation and Ukraine over 2022 store and online sales in constant currency between 1 February and 13 March 2023 increased 17.5%.

Inditex continues to see strong growth opportunities. Our key priorities are to continually improve the product proposition, to enhance the customer experience, to increase our focus on sustainability and to preserve the talent and commitment of our people. Prioritising these areas will drive long-term organic growth.

The flexibility and responsiveness of our business in conjunction with in-season proximity sourcing allows a rapid reaction to fashion trends and a unique market position. Our business model has great potential going forward.

The growth of the Group is underpinned by the investment in stores, the advances made to the online sales channel and the improvements to the logistics platforms with a clear focus on innovation and technology. Sustainability is a key part of the strategy.

Over 2022, we have seen very strong progress of our unique business model and a material increase in differentiation through efficiencies in all areas of our operations that will result in an enhanced customer experience.

To take our business model to the next level and extend our differentiation further we are developing a number of initiatives in key areas for the coming years.

/ Product Proposition

We will continue focusing on the creativity, quality and design of all our products and reinforcing the commercial initiatives of all our concepts. Zara Woman Vacation Look, Massimo Dutti Linen or Bershka Denim Statement are just some of the proposals that will be available throughout 2023.

To strengthen our ability to offer customers the latest fashion where and when they want, we are going to increase our logistics capacity in our distribution centers in Arteixo, in Zaragoza and in Lelystad (Zara), Tordera (Bershka) and Sallent (Stradivarius) with a special focus on the optimisation and automation of our operations.

/ Customer experience

We will continue to offer the best shopping experience to our customers, both in our stores and on our online platforms.

Regarding our stores, the concepts will launch in new markets (Stradivarius in Germany, Oysho in the United Kingdom) and new locations (Zara in Champs Elysées-Paris and in Plaza del Duque-Seville). Additionally, we will make important enlargements in some of our most emblematic stores (Zara Rue de Rivoli-Paris, Zara Stratford-London or Bershka Vittorio Emanuele-Milan).

We see significant long-term growth opportunities in the United States. Over 2023-2025, Zara will undertake at least 30 projects (new stores, relocations and enlargements) in cities such as New York, Los Angeles, Miami, Chicago, Boston, Dallas, Austin and Las Vegas.

From 2023, we will introduce a new security technology in our stores that will eliminate the need for hard tags. This new technology will allow a significant improvement in customer experience, facilitating interaction with our products and improving the purchasing process. The new system will be progressively implemented in all the concepts and will be the basis for us to continue deepening the digitalisation of stores and their integration with online platforms in the coming years.

In our online channels, we will also continue to improve our customers' experience by making tools available to them such as a new size recommender and a real-time personalisation model that will facilitate the search.

/ Sustainability

At Inditex we are on the right track to achieve all the sustainability commitments previously announced. In this sense, in 2022 we achieved 100% of the electricity used in our facilities (central services, logistics platforms and stores) from renewable energy.

In terms of circularity, the Zara Pre-Owned platform, currently available in the United Kingdom, will reach new relevant markets, starting with France and Germany. Through this platform, we will continue helping our customers to extend the life cycle of their Zara garments through donation, repair or resale.

We continue deepening our sustainability strategy and we will present at the next AGM new commitments that demonstrate our ambition in this area.

/ People

We will continue to promote the talent and commitment of our teams in order to reinforce our attractiveness as a benchmark employer.

In 2023, our Changemakers project will already be present in all markets and with the ambition of having at least one sustainability ambassador in each store.

We are increasing our diverse and inclusive character, strengthened by our incorporation into the Global Business and Disability Network of the International Labor Organization (ILO) and our commitment to double the number of employees with some type of disability in two years.

Our commitment goes beyond our teams and reaches the people who work in our supply chain. In 2022, we have reached the fifteenth anniversary of our agreement with IndustriALL. This is one of the key tools used to promote worker participation, respect for freedom of association and collective bargaining. The next step will be the launch of a new strategy for Workers in the Centre 2023-2025 with renewed ambition in order to be able to positively transform the entire industry.

Inditex operates in 213 markets with low share in a highly fragmented sector and we see strong growth opportunities. We expect increased sales productivity in our stores going forward. The growth of gross space in 2023 will be around 3%. Optimisation of stores is ongoing. Inditex expects space contribution to sales to be positive in 2023. We continue to see a very healthy evolution of online sales and an increasing participation in the group total. At current exchange rates Inditex expects a -1% currency impact on sales in FY2023.

For 2023, Inditex expects a stable gross margin (+/-50 bps).

For 2023, we are planning investments that will scale our capabilities, obtain efficiencies and increase our competitive differentiation to the next level. We estimate ordinary capital expenditure of around €1.6 billion.

R&D+I activities

The Inditex Group carries out research, development and innovation activities in all areas of its business with the aim of improving the manufacturing and distribution processes and developing technologies that facilitate business management, either using its own resources or with the help of third parties. In particular, we highlight the activity of designing clothing, accessories and household items, logistics and those related to technology linked to point-of-sale terminals, to administration and inventory management systems, to delivery systems at distribution centres, to communication with stores, to garment labelling and, finally, to the activity linked to the digital transformation of the business.

Acquisition and sale of treasury shares

The Annual General Meeting held on 16 July 2019, approved a 2019-2023 Long-Term Incentive Plan (Note 26 to the consolidated annual accounts for 2019) and authorised the Board of Directors to derivatively acquire treasury shares to cater for this plan. Likewise, the Annual General Meeting held on 13 July 2021 approved a new 2021-2025 Long-Term Incentive Plan (Note 26 to the consolidated annual accounts for 2021).

At 31 January 2022, the Company owned a total of 4,226,305 treasury shares, representing 0.136% of the share capital.

During the first half of 2022, the first cycle (2019-2022) of the 2019-2023 Long Term Incentive Plan was settled. The part of the incentive in shares was delivered to the Plan beneficiaries and charged to treasury shares already owned by the Company on the delivery date. 1,793,791 shares, representing 0.058% of the share capital were delivered.

On 12 July 2022, pursuant to a new Temporary Share Buy-back Programme and under the authorisation in force granted by the Annual General Meeting, 2,500,000 treasury shares were acquired, in order to enable the Parent to fulfil the requirements of shares delivery to beneficiaries of the second cycle of the 2019-2023 Long-Term Incentive Plan as well as to the beneficiaries of the first cycle, and if applicable, the second cycle of the 2021-2025 Long-Term Incentive Plan.

Consequently, at 31 January 2023, the Company owned a total of 4,932,514 treasury shares, representing 0.158% of the share capital.

Other salient information

Stock market information

The Inditex share price closed 2022 at 28.62 euros per share on 31 January 2023, presenting an increase of 7%. The average daily trading volume was approximately 4.3 million shares. In the same period, the Ibex 35 was up by 5% while the Dow Jones Stoxx 600 Retail rose by 17%.

Inditex's market capitalisation stood at 89,199 million euros at the end of the period, up 873% on its capitalisation when its shares were admitted to trading on 23 May 2001, as compared with a 6% decrease in the Ibex 35 index in the same period.

The dividend for 2021 totalling 0.93 euros per issued share was paid in May and November 2022.

Dividends policy

The dividends paid by the Parent in 2022 and 2021 amounted to 2,895 million euros and 2,180 million euros, respectively. These amounts correspond to payments of 0.93 euros per share and 0.70 euros per share, respectively.

The distribution proposed by the Board of Directors is shown in Note 29.

Other disclosures

Related party transactions

Transactions with related parties are described in Note 28 and 30 to the consolidated annual accounts. The Company did not carry out any related party transactions during the year that substantially affected its financial position or results.

Information on average payment periods required by Law 15/2010, of 5 July

The Group's supplier payment policy complies with the periods for payment to suppliers set in the late payment legislation in force. The Group is developing measures to try to reduce the payment period in those rare cases in which the established maximum payment period is exceeded. The aforementioned measures will focus on reducing the length of the processes involved in the receipt, verification, acceptance and accounting of invoices (enhancing use of electronic and technological methods) and improving the procedure for incident resolution in these processes.

Annual Corporate Governance Report

The Annual Corporate Governance Report for 2022 is included herein. It will be filed with the Spanish National Securities Market Commission (CNMV) as an additional regulatory disclosure on 15 March 2023 and is available at www.inditex.com and on the CNMV website (www.cnmv.es).

Non-financial and diversity, equality, non-discrimination and disability information

Group's Statement on Non-Financial Information includes information on diversity, equality, non-discrimination and disability is provided in sections 5.1.1 Diversity, inclusion, equality and work-life balance and 5.1.5 Remuneration policy, which include information about diversity, equality, no discrimination and disability.

Alternative performance measures

The Gross Margin, EBITDA, EBIT, PBT, ROCE, ROE, working capital, net financial position, average net financial debt, quarterly results, sales growth at constant exchange rates and sales in comparable stores, are defined in Note 2 to the consolidated annual accounts for 2022.

The information disclosed in this document may contain statements in relation to future intentions, expectations and projections. All such statements, except for those based on historical data, are forward-looking statements, including, inter alia, those that address our financial position, business strategy, management plans and objective for future transactions. The aforementioned intentions, expectations or projections are subject per se to risks and uncertainties which could cause actual results to differ from those anticipated.

These risks include, but are not limited to, competition within the sector, consumer preferences and spending trends, economic and legal conditions, restrictions on free trade and/or political instability in those markets where the Inditex Group has a presence or in those countries in which Group products are manufactured or distributed.

The risks and uncertainties that could potentially have an impact on the information disclosed are difficult to predict. The Group undertakes no obligation to publicly update or revise any of the forward-looking statements in the event that any unforeseen changes or events arise which might affect them.

Independent Verification Report of the Consolidated Non-financial Information Statement

GRI 2-5

INDEPENDENT LIMITED ASSURANCE REPORT OF THE CONSOLIDATED NON-FINANCIAL INFORMATION STATEMENT

Translation of a report originally issued in Spanish. In the event of discrepancy,
the Spanish-language version prevails

To the Shareholders of Industria de Diseño Textil, S.A.:

Pursuant to article 49 of the Code of Commerce we have performed a verification, with a limited assurance scope, of the accompanying consolidated Non-Financial Information Statement (hereinafter NFS) corresponding for the year ended 31 January 2023 (hereinafter year 2022) of Industria de Diseño Textil, S.A. and subsidiaries (hereinafter, the Group) which is part of the Group's consolidated Directors Report.

The content of the NFS includes additional information to that required by prevailing mercantile regulations in relation to non-financial information statement that has not been subject to our verification. In this regard, our review has been exclusively limited to the verification of the information shown in the table "Index of contents required by Act 11/2018" and the contents subject to external verification included in table "GRI Content Index" included in the accompanying NFS.

Responsibility of the Board of Directors

The formulation of the NFS included in the Consolidated Directors Report of the Group, as well as the content thereof, is the responsibility of the Board of Directors of Industria de Diseño Textil, S.A. The NFS has been prepared in accordance with the content required by prevailing company law and in accordance with Global Reporting Initiative Sustainability Reporting Standards (GRI standards), as well as those other criteria described according to what is mentioned for each subject in the tables "Index of contents required by Act 11/2018" and "GRI Content Index" of the NFS.

This responsibility also includes the design, implementation and maintenance of internal control deemed necessary to enable the NFS to be free from material misstatement, whether due to fraud or error.

The board of Directors of Industria de Diseño Textil, S.A is further responsible for defining, implementing, adapting and maintaining the management systems from which the information necessary for the preparation of the NFS is obtained.

Our Independence and quality control

We have complied with the Independence and other ethics requirements of the Code of Ethics for Accounting Professionals issued by the International Ethics Standards Council for Accounting Professionals (IESBA) which is based on the fundamental principles of integrity, objectivity, professional competence and diligence, confidentiality and professional behavior.

Our firm applies International Quality Control Standard 1 (NICC 1) and maintains, accordingly, a global quality control system that includes documented policies and procedures relating to compliance with ethical requirements, professional standards and applicable legal and regulatory provisions.

The work team has been formed by professionals who are experts in reviews of Non-Financial Information and, specifically, in economic, social and environmental performance information.

Our responsibility

Our responsibility is to express our conclusions in an independent limited verification report based on the work performed. Our review has been performed in accordance with the requirements established in the prevailing International Standard on Assurance Engagements 3000 "Assurance Engagements Other than Audits or Reviews of Historical Financial Information" (ISAE 3000 Revised) issued by the International Auditing and Assurance Standards Board (IAASB) of the International Federation of Accountants (IFAC) and the guidelines for verifying the Non-Financial Statement, issued by the Spanish Official Register of Auditors of Accounts (ICJCE).

The procedures carried out in a limited assurance engagement vary in nature and timing and are smaller in scope than reasonable assurance engagements and, therefore, the level of assurance provided is likewise lower.

Our work consisted in requesting information from Management and the various Group's units participating in the preparation of the NFS, reviewing the process for gathering and validating the information included in the NFS, and applying certain analytical procedures and sampling review tests as described below:

- ▶ Meetings with the Group's personnel to know the business model, policies and management approaches applied, the main risks related to these matters and obtain the necessary information for our external review.
- ▶ Analysis of the scope, relevance and integrity of the content included in the NFS based on the materiality analysis made by the Group and described in the section "Priority Issues", considering the content required by prevailing mercantile regulations.
- ▶ Analysis of the processes for gathering and validating the data included in the 2022 NFS.
- ▶ Review of the information on the risks, policies and management approaches applied in relation to the material aspects included in the 2022 NFS.
- ▶ Check, through tests based on a selection of a sample, of the information related to the content of the 2022 NFS and its correct compilation from the data provided by the information sources.
- ▶ Reception of a representation letter from the Board of Directors and Management.

Emphasis paragraph

Regulation (EU) 2020/852 of the European Parliament and the Council, June 18 2020, on the establishment of a framework to facilitate sustainable investments settles the obligation to disclose information on how and to what extent the company's activities are associated with economic activities that are considered aligned in relation to climate change mitigation and adaptation objectives for the first time for the financial year 2022; additionally to the information related to eligible activities required in financial year 2021. Consequently, comparative information about alignment has not been included in the accompanying Consolidated Management Report. Additionally, information has been incorporated for which the Board of Directors of Industria de Diseño Textil, S.A. have chosen to apply the criteria which, in their opinion, best enable compliance with the new obligation and which are defined in the section "Regulation EU (2020/852)" of the attached NFI. Our conclusion has not been changed in relation to this issue.

Conclusion

Based on the limited assurance procedures conducted and the evidence obtained, no matter has come to our attention that would cause us to believe that the Group's NFS for the year, 2022 has not been prepared, in all material respects, in accordance with the contents required by the prevailing company law and in accordance with GRI standards' criteria, as well as other criteria, described as explained for each subject matter in the table "Index of contents required by Act 11/2018" and the contents subject to external verification included in table "GRI Content Index" of the NFS.

Use and distribution

This report has been prepared in response to the requirement established by prevailing company law in Spain and may not be appropriate for other uses and jurisdictions.

Message from the Chairperson

GRI 2-22; 3-3

Inditex's true strength, which enables us to tackle any challenge, no matter how difficult is, the thousands of people who make up the Group. It is their talent, creativity, enthusiasm, and hard work that make Inditex better and better. Performance in 2022, the year in which I had the honour of becoming the Group's non-executive chairperson, was a good example of that strength. Thanks to the magic that exists at this company, the magic our talented and devoted teams put into everything they do, we performed very well despite an uncertain and complex backdrop.

A refusal to settle, a passion for things well done and tirelessly striving to do things better are the characteristics that define us. This magic permeates our stores, our brands' sales and design teams, our logistics facilities, our production centres and our corporate departments. It explains our achievements and guarantees that what comes next will likewise astonish.

Our model pivots around design and product, the quality of our customer relations and our responsibility to our surroundings. By always working as a team, combining humility with ambition, we are forging a company that never loses its essence despite evolving constantly. We don't want to be fast; we want to be agile and flexible. We don't want to be big, we want to be relevant. We want to be agents of change and aspire to lead our industry's transformation. We want to have a positive impact in everything we do.

The confidence placed in our brands and products by our store and online customers all over the world drives us. The achievements and milestones obtained through the Group in a year as challenging as 2022 encourage us to go on working with the same enthusiasm, ambition and determination as always. Fashion is our passion and our contribution is to constantly provide more creativity and quality along with the greatest responsibility.

Marta Ortega Pérez.

CEO's statement

GRI 2-22; 3-3

During the past year, my first full year with the privilege of serving as Inditex's CEO and also the year in which we welcomed Marta Ortega Pérez as our non-executive chairperson, our Group delivered outstanding results from all perspectives. Our teams, coupled with our strong corporate culture, once again demonstrated their ability to tackle any challenge, no matter the complexity, as they have been doing throughout Inditex's journey: from its origins as a small clothing maker to become one of the most important players in global fashion retail today.

Excellent business performance

During the reporting period, between 1 February 2022 and 31 January 2023, we delivered on all of the commitments we had made to our stakeholders, as detailed throughout the various chapters of this Annual Report, and our Group performed extremely well. Group revenue increased by 18% year-on-year, underpinned by growth in sales in all geographies with a strong correlation between the increase in traffic to our physical stores and online, where our business reached new records.

Sales growth was accompanied by strong profitability: our gross margin reached record levels and stringent control saw operating expenses up three percentage points lower than our topline growth. As a result, net profit came in 27% above that of 2021 and our net cash topped the €10,000 million mark for the first time.

Hard-working and committed team

None of those figures would be possible without the talent and creativity of our designers, the excellent work done by our commercial professionals, logistics and corporate departments at each of our brands, and the commitment of our store teams, made up of more than 140,000 people whose dedication takes our customers' shopping experience to the next level.

Every team member plays an active role in Inditex's strategy and that of its brands, Zara and Zara Home, Massimo Dutti, Pull&Bear, Bershka, Stradivarius and Oysho. They all share our passion for fashion, our determination to offer quality, on-trend products, as well as our tireless efforts to improve the customer

experience in our physical stores and online, and the conviction with which we are progressing on the delivery of our sustainability commitments. Identifying and nurturing talent is another of the strategic cornerstones of the Inditex model.

Pioneering sector transformation

We are aware of our duty and ability to lead the transformation of our sector towards a more sustainable and circular pathway. We believe that innovation, strongly embedded into Inditex's culture, is a key component of that transformation. And we believe that working in collaboration is the best strategy. We set multiple transformational initiatives in motion in 2022 and worked intensively on others that will materialise in the near future. Our hard work in recent years has helped us to achieve some of our targets ahead of schedule and make substantial progress in our energy and water efficiency, improving our supply chain processes, markedly increasing the use of preferred fibres and extending our products' life cycle, to name a few.

We reiterated and reinforced our commitment to the United Nations Guiding Principles on Business and Human Rights and to the Global Compact and its principles, and the Sustainable Development Goals. In keeping with our transparency pledge, over the coming pages we seek to provide a detailed account of the progress we have made in all of these areas, ensuring the integrity of the data reported and upholding, in our concluding sections, the principles of the Integrated Reporting framework.

Commitment to each other and our communities

Ultimately, our top priority is people: those who make up our Group and those who we interact with, such as our customers and suppliers, and those who are part of the communities where we do business. With all of our relationships and especially with our own teams, we promote the values of diversity and inclusion, which is promoted at all levels, and we support and develop employment opportunities for the most vulnerable. Our community investment increased in 2022: we earmarked over €89.7 million to community projects that benefitted more than 3 million people.

I want to take this opportunity to express the pain we've been feeling for Ukraine since February 2022 and the terrible consequences the war is having on its citizens and those who have had to leave the country. And in 2023, our thoughts are also with the victims of the earthquake in Turkey and their families, sadly including colleagues at Inditex. We intend to continue to support the communities where we can be of use, mainly in partnership with the organisations with which we have built long-standing, stable relations.

In this respect, at Inditex we want to have a positive impact across our activities including on the environment and our communities; on people within and beyond the Group; and on our value chain, including our suppliers and business partners. We want to do this in collaboration with our partners while leveraging our ability to lead. And always ensuring we operate with humility and prudence, but with extraordinary ambition and embracing the fashion industry's transformational power.

Óscar García Maceiras

CEO

3. Get to know Inditex

3.1. Global footprint and key data / 3.2. 2022 milestones / 3.3. Inditex in figures, key indicators / 3.4. Recognitions / 3.5. Retail formats

The Inditex Group is a family of several brands: Zara, Pull&Bear, Massimo Dutti, Bershka, Stradivarius, Oysho and Zara Home. All of them share the same objective: to offer our customers across more than 200 markets an inspiring, quality and responsibly produced fashion proposal.

3.2. 2022 milestones

FEBRUARY

Inditex included in the Carbon Clean 200™ and recognised in the S&P Global Sustainability Yearbook. Our Group is awarded bronze class in the latest edition of the Report, which assesses companies' sustainability performance.

MARCH

Bershka's Custom Lab

The brand unveils CUSTOM LAB, an innovative proposal for garment customisation that joins the Denim Lab initiative for customising denim garments with different patterns and prints. Thus, Bershka continues to offer its customers creative and customisation options.

APRIL

Marta Ortega, Chairperson of Inditex

"I start this new chapter with a deep sense of responsibility and a great deal of pride in doing so as part of an amazing team of people, who are the heart and key to the success of this company." Marta Ortega wrote in a letter to Inditex employees on the day of her appointment.

MAY

Launch of Massimo Dutti Studio

Massimo Dutti Studio is synonymous with the history of the brand and sums up its multiple facets: timeless femininity and a spirit of innovation. The collection is a tribute to today's woman, with her own distinct identity.

JUNE

Zara Home with Vicent Van Duysen

The brand embarks on a new chapter in partnership with the Belgian architect and designer. The result is a line based on mutual respect between the brand and the creative. The collection, which will be updated with new designs twice a year, débuts with a selection of living room pieces.

JULY

Investment in CIRC

Inditex makes a venture investment in CIRC, an innovative start-up that promotes a disruptive recycling technology with the aim of generating new sustainable fibres for use in the textile industry. This investment comes in addition to the three-year commitment to purchase 30% of the production volume of Infinna™, a fibre created entirely from textile waste, for more than 100 million euros.

AUGUST

Zara and Renewcell

As Zara continues its journey towards circularity, it launches a capsule collection in collaboration with the Swedish start-up Renewcell, whose technology transforms pre- and post-consumer textile waste, such as used jeans, into cellulose pulp.

SEPTEMBER

Oysho Training launch

The brand launches a new, free fitness, yoga and running workout app with workouts for all levels. With more than 300 workout sessions to suit every ability, Oysho Training aims to offer a broad range of quality workouts led by international trainers.

OCTOBER

Strengthening our commitment to IndustriALL

Inditex and IndustriALL further cement their commitment by signing a new Action Protocol on the 15th anniversary of their Global Framework Agreement. This agreement underpins our commitment to promoting mature labour relations that safeguard employee well-being.

NOVEMBER

Zara Pre-Owned

In the UK, Zara launches Pre-Owned, a ground-breaking integrated platform for customers to make more sustainable choices regarding their used clothing and thereby contribute to cutting waste and raw material consumption. The platform will offer repair services sales between individuals and garment donation services.

DECEMBER

Agreement with WWF

Inditex will earmark more than 10 million euros to WWF environmental projects by 2025. The two organisations have signed a three-year agreement to foster environmental projects focusing on ecosystem conservation. The agreement envisages a contribution of at least three million euros a year, which Inditex has ramped up to 4.2 million euros for 2022.

JANUARY

Constitution of ARTE and the Association for Textile Waste Management

The Group, alongside other brands—together representing one-third of the textile sector in Spain—set up the Spanish Textile Retail Association (*Asociación Retail Textil España*, ARTE) to represent the sector at the national level and voice the industry's opinions. Moreover, in conjunction with other brands of its sector, the Group set up the Association for Textile and Footwear Waste Management (*Asociación para la Gestión del Residuo Textil*), with the aim of managing textile and footwear waste generated in the Spanish market by means of a Collective Extended Producer Responsibility scheme (EPR).

² ESG (environmental, social and governance) objectives, and in particular sustainability, are a cornerstone of the Company's strategy. Against this backdrop, commitments and objectives have not been affected by the current situation of Russia and Ukraine, and progress continued to be made as planned during the year. Where any specific ESG indicator has been affected as a result of the economic circumstances of this year, its performance is detailed separately in the relevant section of this Report.

1. The figures for 2018 have been updated as compared with the Annual Report, to include data that were not available at that time.

2. Since 2019, the scope of the information reported has been broadened to increase suppliers and manufacturers of non-textile articles. Consequently, the information for FY 2018 is not comparable.

3. Suppliers of fashion articles with a production of over 20,000 units/year in the 2022 spring/summer and autumn/winter campaigns. Suppliers producing less than 20,000 units account for 0.22% of overall production.

4. Factories declared by the suppliers in the manufacturer's management system for 2022 orders.

5. Includes audits performed with Inditex own audit methodology. In 2022, 2021 and 2020, traceability, pre-assessment, environmental preliminary assessment (only in 2022), social, special and environmental audits are included. In previous years, environmental audits are not included since the changes to the Green to Wear standard do not allow their comparison.

6. Main programmes carried out in the field

7. Data on type of working hours and type of contract available in 2022 for 100% of the workforce (98.2% in 2021, 95.4% in 2020 and 94.7% in 2019).

8. The figures for the proportion of full-time and part-time employees reported in 2020 have been corrected with respect to those published in the Annual Report for that year.

3.4. Recognitions

GRI 3-3

Our relationship with trade unions, NGOs, governments and other civil organisations is fluid, continuous and key to implementing our sustainable business model. Their recognition over the course of 2022 for our work on various environmental and social aspects is an incentive to continue to make progress.

In its 2022 edition, the Ethical Fashion Report published by Baptist World Aid Australia awarded Inditex 60 points out of 100, ranking it among the top 20 global companies for its sustainability practices throughout the supply chain, with a strong focus on human and labour rights. The organisation, which has changed its scoring methodology and scope of analysis this year, examined a total of 120 global companies encompassing 581 brands.

For the fourth consecutive year, the Bloomberg Gender Equality Index (GEI) recognises Inditex's commitment in January 2023. This index assesses companies' commitment to gender equality on the basis of five pillars: female leadership and talent pipeline, equal pay and gender pay parity, inclusive culture, anti-sexual harassment policies, and pro-woman brand. This index features more than 400 companies from 50 different sectors and more than 40 countries around the world.

In 2022, CDP upgraded Inditex rating, distinguishing its efforts to fight climate change, as well as the quality of the information it publishes and its performance on this front, with an A rating.

Inditex, included in the DJSI World and in the DJSI Europe, in 2022 scores 73 points out of 100 in the S&P Global Corporate Sustainability Assessment. This performance earned Inditex a score in the 99th percentile in the retail sector. With regard to the environment, Inditex was awarded a score of 87 out of 100 and placed in the 100th percentile in the retail sector among all the companies evaluated.

FINANCIAL TIMES

For the third time, in 2022 the Financial Times Diversity Leaders ranking included Inditex in its list of European companies seeking to achieve full inclusion at the workplace.

The British financial daily newspaper has also included the Group in its Europe's Climate Leaders 2022, which highlights companies that have concentrated their efforts on reducing greenhouse gas emissions.

Forbes

The Forbes Global 2000 list once again includes Inditex among the global companies selected on the basis of four indicators: sales, profits, assets and market value.

For the fourth consecutive year, Inditex received a score of 4.7 out of 5 in the FTSE4Good sustainability index. This stock index ranks the global companies with the strongest sustainability commitment, and examines their social, environmental, and corporate governance practices.

In 2022, World Benchmarking Alliance (WBA) presented its new Nature Benchmark, which assesses about 400 companies' efforts to protect the environment and biodiversity. Inditex ranks 11th among the companies analysed. Nature Benchmark notes that Inditex "demonstrates clear leadership [...] across several nature-related topics" and, in particular, it highlights the company's performance "in the social inclusion and community impact area, where its commitment to respect the right to water and sanitation of communities where its suppliers are located stands out".

In 2022, and for the twelfth consecutive year, Inditex topped the Merco Talento Responsibility and Corporate Governance ranking which best attract and retain personal talent. This organisation also ranks Inditex second place in its Merco Empresas ranking, which assesses the companies with the best corporate reputation.

Most Attractive Employers

For the eighth year running, Universum has included Inditex among the best companies in which to develop professionally. In this latest edition, university students chose Inditex in various categories: Business and Commerce; Humanities, Art and Education; and Law.

3.5. Retail formats

GRI 2-6

Zara

"Working with Zara has been an eye-opening experience for me. It's been great to go through the archive and revisit the things that we loved. It is also incredible to see them through Zara's design team's fresh eyes. They are such a professional team excited about each piece and making sure the essence of the original ones are maintained." That was how US designer Narciso Rodríguez summed up his collaboration with Zara: a total of 25 garments and accessories taken from his archive and reinterpreted by the design teams in the **Narciso Rodríguez x Zara** collection, which has become one of the season's highlights.

This collaborative side has also surfaced in initiatives such as The Song of the Earth jewellery and accessories collection, in partnership with French designer **Elie Top**; the denim capsule with **The Good American** for the US market; the **Studio Nicholson + Zara Man** collection, featuring deconstructed menswear classics in collaboration with the independent UK firm; or **Into the Night**, a collection of timeless garments for special occasions inspired by Parisian nightlife, featuring the iconic Kate Moss, photographed by David Sims.

In its journey towards circularity, and with the aim of extending the useful lives of fabrics, garments and collections, several notable initiatives implement new textile fibres such as the recycled Infinna™, the result of a collaboration between Inditex and **Infinite Fiber**, or the capsule with Swedish start-up **Renewcell**, whose technology transforms pre- and post-consumer textile waste, like used jeans, into cellulose pulp. Moreover, in the UK, the **Zara Pre-Owned** platform was launched, aimed at helping customers to lengthen the useful lives of their garments through repairs, sales among individual customers of their Zara garments from any season, and donations.

This year, Zara also unveiled its new global store image, with spaces focusing on the latest commercial and technological developments from the integrated store and online platform. Flagship locations such as Madrid's Plaza de España, or London's Battersea, among others, are some of the emblematic openings deploying this new concept.

Pull&Bear

Music, sports and digital innovation have been the focuses of Pull&Bear's activity in 2022. In this regard, the incursion into the virtual reality of the **metaverse** is among this year's main developments. In developing this universe, the brand has devised a configurator for users to customise their own avatar and dress it with Pull&Bear clothing and has staged events such as the **first Nicki Nicole concert** on Roblox. The concert featured the artist's avatar dressed in garments from Pull&Bear SS22.

Digital innovation also led to functionalities like the **virtual fitting room** for sneakers, an augmented reality tool enabling people using the app to try on the latest trends in sports footwear. Sport also has a prominent place in the brand's collections, which include notable collaborations with iconic brands like **Spalding** and **Penn Sport**.

Through its involvement in **Primavera Sound** Los Angeles, the brand has further cemented its collaboration with one of the foremost music festivals on the international scene. And, on social media, the **#pullandbearcommunity** enjoyed *On the record*, *video* capsules featuring musical content to promote upcoming artists. Music is also present in the denim collections which revive the aesthetic of 1980s and 90s music bands.

Massimo Dutti

Sophistication and the championing of modernity and legacy have defined Massimo Dutti's activity this year. The brand unveiled **Studio**, a collection of garments for special occasions in vibrant colours that pay tribute to today's woman.

Through **Masterpieces**, the brand re-releases and reinterprets its most iconic creations: a selection of pieces that have become style icons or must haves. The black dress with cut-outs and the slip dress with lingerie details for women, or the sweaters, trench coats and tailoring for men are some of the designs that capture the essence of luxury and underpin the brand.

The permanent quest for **excellence in our customer service** was also evidenced by the design and implementation of the retail spaces, with a new **interior design concept** that affords maximum visibility to the product, and with services that allow customers to interact with the physical store from their mobile phone, such as Pay&Go – to make payments from any area of the store without passing the till, Shop&Go – to send in-store purchases anywhere in the country with the same flexibility as online, or the range of services offered by Store Mode.

Bershka

Bershka's first foothold in the metaverse in the year, with the virtual showroom **Digital Destinations**—enabling users to explore the brand's special collections in an immersive way—was followed by an event with DJ Steve Aoki and Amnesia Ibiza, broadcast in the virtual world and featuring its own capsule collection inspired by the world of clubbing, **Bershka x Amnesia**.

The brand's digital commitment has been manifest too, in the phygital (physical + digital) and **Smiley x Bershka** collections, also available on the Dressx digital fashion platform, and **Lil' Kreetts**, which includes clothes, footwear, accessories, dolls, augmented reality and even a video game.

The brand has resumed garment customisation through collaborations with graphic artists in its **Custom Lab**, notably including motifs inspired by Carolina Lindberg's graffiti, the designs of the illustrator Benedikt Luft and a capsule to customise denim garments. The customisation lab featured at the MIRA Festival, thereby underscoring Bershka's commitment to digital art.

Stradivarius

The collections linked to popular TV series like **Bridgerton** and **House of the Dragon** featured prominently in an exercise implemented for the first time by Stradivarius when it revamped its visual identity: its logo, a treble clef, now in a more contemporary and refined style and using a special font that represents the brand's renewed femininity.

With the slogan '**Digital Fashion: wear the future now**', Stradivarius also made its first foray into the new business lines linked to the digital world. It offers an immersive experience through the purchase of **digital garments**, that can be added to images for sharing online and that will be presented in capsule collections or drops.

The augmented reality of **Virtual Shoes Try On**, a fitting tool enabling users to try on the latest footwear creations from the app, is another of the new functionalities for users to interact with the digital world.

Oysho

Sports and the most innovative technical fabrics have been the main focus of Oysho this year. The brand presented a collection of **ultralight, high-performing technical jackets**, made with water repellent, breathable and wind-resistant fabrics and designed for any outdoor activity.

The brand also ventured into the digital world with **Oysho Training**, a new, free fitness, yoga and running workout application with sessions for every level. The aim is to offer the brand's sports community high-quality content under the guidance of international trainers. Furthermore, the app features **Mia the virtual trainer**, a 3D avatar that uses augmented reality (AR) to help hone users' technique as they perform the exercises.

The involvement in community races like *the Women's Race*, the Formentera Half Marathon or the sponsorship of the San Silvestre Vallecana in Madrid are still among the brand's hallmarks.

Zara Home³

Collaborations with icons of architecture and design such as Vicent Van Duysen and Saint-Lazare have been at the forefront in a year in which Zara Home continues to expand and consolidate its collections and product categories.

The partnership with the Belgian architect resulted in **Zara Home + by Vincent Van Duysen**, a line that emerged from the mutual respect between the brand and the creative. The first collection in this line comprised living room furniture and items, made from carefully chosen wood and exuding simplicity and versatility. In conjunction with the **Saint-Lazare** design studio, a desk collection was presented, inspired by old bookshops, with stationery products and decorative objects such as notebooks, pencils, file boxes, calendars and posters.

In the field of social and environmental sustainability, the brand has joined the **for&from** initiative, with the opening of its first store in Madrid. It also debuted in the Sustainability Innovation Hub, in a collaboration with **Plastics for Change**, an organisation that recovers plastics from the Indian coastline to repurpose them, with which the brand has developed a 100% recycled polyester rug.

4. Our strategy

Business model and strategy / 4.1. Sustainability, one of our pillars / 4.2. Stakeholder engagement

Our unique business model has enabled us, in just a few decades, to turn a small sewing workshop in A Coruña into one of the most relevant actors in fashion retail worldwide. For this, the Group relies on four solid pillars: a unique fashion proposal, a differential shopping experience, an extraordinary team and the implementation of responsible practices at every stage of our activity.

Business model and strategy

GRI 2-1; 2-6; 2-23; 3-3

The Inditex Group is a family of several commercial brands: Zara, Pull&Bear, Massimo Dutti, Bershka, Stradivarius, Oysho and Zara Home. All of them share the same objective: to offer our customers across more than 200 markets an inspiring, quality and responsibly produced fashion proposal.

Our fashion distribution and sales activity is carried out through an international group of companies, the Inditex Group, whose parent company is Industria de Diseño Textil, S.A., (Inditex S.A.), which is listed on all four Spanish stock exchanges. Details of the corporate structure at 31 January 2023 are provided in Annex I of the Consolidated Annual Accounts of the Inditex Group.

① Detailed information on the markets in which Inditex operates can be found in the [Consolidated Directors' Report](#)

Our unique business model, which covers all the stages from the design of our products to their sale in our stores and online platforms, has enabled us, in just a few decades, to turn a small garment workshop in A Coruña into one of the most relevant actors in fashion retail worldwide, grounded **on four solid pillars**.

The first of these is our ability to offer, season after season, a **unique fashion proposal**, built on creativity, emotion, innovation, quality and, above all, on permanently listening to the needs and wishes of our customers. All our commercial formats excel in their capacity to adapt and respond to any change in the market or the emergence of any new trend, which allows us to develop fine-tuned production processes, with short runs that are fully adapted to demand. The significant weight of production in geographical areas close to our headquarters in Spain is key for us, as it allows us to prioritise flexibility and efficiently control the entire production process.

At Inditex, moreover, we constantly strive to give our customers access to that excellent fashion proposal through an **increasingly engaging shopping experience**, whether in our more than 5,800 stores or through the online channels of the Group's seven brands. We pride ourselves on having unique retail spaces in prime locations in the heart of the world's major cities and equipped with cutting-edge energy efficiency systems. Our commercial concept is based on spacious stores fitted with the most innovative technological tools to offer the customer a unique and integrated experience with online platforms. The unique inventory system that allows a streamlined response to the market is only possible thanks to the excellent work of our teams and the continuous improvement of our logistics systems.

The key factor that explains the performance of our business model is the **extraordinary team** that makes it all possible. Inditex is made up of more than 160,000 passionate and curious people who are driven by the desire to excel and grow every day, regardless of their specific location or professional task. Nurturing our talent, through continuous training and growth opportunities, is an obsession for us. We see our company as having a character of its own, in which attributes such as humility, ambition, high levels of individual responsibility, a sense of belonging and teamwork are not platitudes, but tangible realities that permeate everything we do and underpin the commitment of all our employees.

The last pillar on which our business model rests is **sustainability and responsibility**, the way we see our activity and our relationship with the surrounding environment. Inditex, which was launched with the aim of creating quality fashion and design at an attractive price, has had a comprehensive sustainability strategy since 2001, when we became one of the companies adhered to the United Nations Global Compact.

At Inditex we firmly believe in our capacity to act as an agent of change within the fashion industry and we are making notable efforts to reduce the environmental impact of our activity, as part of a circularity strategy that applies to all our processes. Our sustainability action plan is enabling us to achieve more ambitious targets each year, such as the use of 100% renewable electric power in our operations and the increasing use of preferred fibres and materials in line with our sustainability objectives, to reach our goal of net zero emissions by 2040.

These developments in sustainability would not be possible without an equally firm commitment to innovation and research, either through our Sustainability Innovation Hub, the platform with which we are continuously seeking the best materials, approaches and processes, or through start-ups, scientific institutions and third-sector organisations that have become our partners of reference, with whom we have pledged to collaborate and invest.

Our business model encompasses four main phases: design; manufacture and supply; logistics and distribution; and, lastly, our stores and online sales channels.

/ Design

We have a team of more than 700 designers that contribute exceptional talent, unfettered creativity and in-depth knowledge of the customers they create for. Their visionary and highly-skilled work is based on analysing sales, receiving daily feedback from our stores and sales teams, and on their innate capacity to interpret trends. Always impeccably well informed, they are able to intuit, and even to anticipate, our customers' needs all over the world.

All that talent is underpinned by the conviction that responsible fashion starts at the drawing board. Our designers are mindful of their role and pay special attention to the materials and processes used in our articles, thereby moving forward in the circular economy model that our Company promotes. In this regard, innovation is pivotal, since it enables us to find alternative solutions to conventional raw materials.

/ Manufacturing and procurement

Our origins as a sewing workshop make us especially appreciative of the role our non-exclusive suppliers and manufacturers play in creating high quality products and in our value proposition. Our supply chain is organised by means of twelve clusters, and their socially and environmentally responsible management is the cornerstone of our approach to procurement and manufacturing. Accordingly, we ensure that our suppliers' and manufacturer's workers have decent conditions and we further minimise our environmental impact.

We prioritise flexibility, which is why a remarkable portion of our end-product manufacturers are located in areas close to our headquarters in Spain. This proximity, together with short production runs, gives us flexibility and control over the process, which means we can adapt our commercial offering to changing trends as they arise.

/ Logistics and distribution

Our logistical flexibility to adapt to commercial decisions has been a key factor in our expansion across more than 200 markets.

The Group's various brands distribute their stock to stores and online warehouses around the world from centralised logistics hubs, efficiently integrating our store and online operations during the warehousing, shipping and distribution processes. By adopting and developing technologies such as Radio Frequency Identification (RFID) or the Integrated Stock Management System (SINT), we have merged the inventory management of all our brands. Thus, our staff can quickly locate any article, regardless of where it is located, and make it available to customers.

/ Stores/online

All our stores, whether physical or online, are merged into a single sales platform. We take extreme care of all points of contact between our brands and customers: cutting-edge designs, sophisticated spaces and innovative technology geared to offering the best possible experience. That's why we never stop looking for ways to improve our stores—located in the world's most exclusive and technologically advanced shopping areas—while revolutionising e-commerce with high-end fashion editorials that deliver the originality and inspiration our customers want.

Managing risk is inherent to our business model and directly responds to the precautionary principle throughout our value chain, a responsibility of each and every member of Inditex. We have systematic processes for identifying, assessing, recording and monitoring risks to ensure they are managed in the best possible way. The Integrated Risk Management and Control System emanates from the Board of Directors and is articulated in the form of several regulations aimed at managing the various scenarios.

① More information in section [6.3. Responsible risk management](#) of this Report.

Transversal and collaborative innovation

Innovation is one of the transversal axes on which the four pillars of our strategy are aligned.

Through innovation, every day we aim to be **more creative, agile, efficient and respectful** in our interactions with our customers and our surrounding community alike. And, needless to say, **we strive to hone the customer experience and strengthen customers' trust** every time they choose us.

Our innovation model is **cross-cutting, flexible, collaborative and open**, not only to all the Company's areas and people, but to any organisation, entity or person with a different idea or disruptive proposal that helps build a better and more sustainable present and future.

Inditex's capacity for innovation and transformation is evidenced by the numerous projects that the Group has underway. All these initiatives permeate every area and level of the Company and every stage of our value chain (design, manufacturing, transport, logistics, distribution, sales, product use, circularity and end-of-life), and will be detailed over the course of this report. Some examples are Zara's launch of Pre-Owned, a platform that helps our customers to extend the useful life of our products; the deployment of Store Mode in five of the Group's brands, the availability of virtual shoe fitting in the Pull&Bear and Stradivarius apps; or the launch of a detergent, The Laundry by Zara Home, —developed in collaboration with BASF—that reduces the release of microfibres when garments are washed.

Business model

Inditex's business model aims to satisfy our customers' expectation by offering inspiring, high quality and responsibly produced fashion.

Our strategy is based on four pillars: unique fashion proposals, an enhanced customer experience, the

commitment of our people and sustainability applied to all the stages of our value chain.

With them, through transparency and constant dialogue with our stakeholders, we work to promote human rights, the Sustainable Development Goals and, in particular, to create environmental and social value in our environment.

4.1. Sustainability, one of our pillars

GRI 2-6; 2-12; 2-16; 2-24; 2-28; 2-29; 3-1; 3-3; 201-2; 201-3

The commitment to sustainability permeates the entire Company: from the governing bodies, articulated through a strong sustainability governance structure, to the entire workforce, including offices, logistics hubs and stores. This has enabled us to progress towards our specific goals to generate value.

We rely on four key elements to implement our sustainability strategy: culture, collaboration, transparency and innovation.

Sustainability culture

Sustainability is ingrained in all our processes and decisions throughout our value chain. From product design to store management, it is a shared principle. To ensure it permeates all our people, regardless of their position and function, we carry out various actions aimed at creating a culture of sustainability throughout the Company.

For example, new recruits at offices receive training in which sustainability is prominent. After an initial overview, depending on their post, they receive more thorough training in the various Group's programmes.

This training is especially important for our buying and product teams, since their actions and decisions have a direct impact on the sustainability of our products and supply chain. That is why, since 2021, we have a specific training programme: The Sustainable Fashion School, co-created alongside the University of Leeds.

Our in-store staff have become the best ambassadors of our sustainability culture and the Changemakers initiative is a clear example of the importance we place on this. Changemakers ensure that sustainability reaches every corner of the Group and also compile suggestions and concerns about sustainability from our teams and customers.

① More information in section [5.1.2 Talent management](#) of this Report.

In 2022, more than 13,000 employees were trained in sustainability.

Collaboration

In keeping with our aim of driving transformation in the textile industry, we take a holistic approach to sustainability, which includes both its integration throughout our entire value chain and collaboration with each and every one of the related actors. Hence, we take an open approach in which collaboration is a pillar of transformation. Examples of this are our engagement with entities such as the United Nations Global Compact, the International Labour Organization, UNI Global Union, IndustriALL

Global Union, The Fashion Pact, Ellen MacArthur Foundation and Zero Discharge of Hazardous Chemicals, among others.

① More information in the [4.2. Stakeholder engagement](#) section of this Report

Transparency

In line with our commitment to transparency, we share information with our stakeholders concerning our sustainability strategy, the programmes on which it is structured, our goals and the progress achieved, among other matters.

Among the foremost examples of our transparency is our annual accountability through this Integrated Directors' Report, as well as the information we regularly publish on our website. We also share a range of detailed and specific information with our various stakeholders, such as shareholders, suppliers, customers or the different organisations with which we collaborate.

Innovation

Inditex is unwaveringly committed to innovation in all its areas, including sustainability.

We believe that in order to drive the industry's transformation, it is not enough to apply the current paradigms, but rather an innovative approach is necessary, one that strives for new solutions. In this context, the Sustainability Innovation Hub, the platform we use to find the best materials, approaches and processes, is an invaluable ally.

Roadmap and commitments

Inditex has a Sustainability Roadmap that is structured around two main pillars: a commitment to the circular economy and decarbonisation – in line with the objectives of the Paris Agreement, and a commitment to the Sustainable Development Goals, to which we add the promotion of and respect for human rights.

Our sustainability roadmap

2022

- / 100% of electricity consumption from renewable sources in all our own facilities (headquarters, logistics centres, factories and stores).
- / More than 50% of articles featuring the Join Life label.

2023

- / 100% of cotton from preferred sources.
- / 100% of man-made cellulosic fibres from preferred sources.
- / Zero Waste from our own facilities: headquarters, logistics centres, factories and stores.
- / 100% elimination of single use plastics for customers.
- / 100% collection of all packaging materials for recycling or reuse in the supply chain (Green to Pack).

2025

- / 100% of polyester from preferred sources.
- / 100% of linen from preferred sources.
- / 25% reduction of water consumption in the supply chain.

2040

- / Net zero emissions.

conducted in a manner that respects people, the wider community and the environment, based upon our commitment to human rights and sustainable development.

- / Green to Wear environmental standard (GtW)
- / Strategy on social management of the supply chain: Workers at the Centre 2019-2022
- / Global Water Management Strategy, Global Energy Strategy, and Biodiversity Strategy

* Approved by the Board of Directors on 9 December 2015, amended on 14 December 2020 and updated on 3 November 2022. Includes:

- / Principles that govern sustainability in the Group.
- / It includes the integration of sustainability into the business model and the cornerstones upon which the organisation's value creation is established.
- / Principles governing stakeholder engagement and the identification of key stakeholders.
- / Principles upon which the communication of sustainability practices is established, strengthening the ongoing dialogue and transparency as a cornerstone for stakeholder engagement.

Sustainability governance

The commitment to sustainability extends to all levels of the Company, starting with the governing bodies - most notably the Sustainability Committee - and permeating the entire organisation, based on a solid system of governance. Moreover, the Group has a Social Advisory Board, an external body that advises us on sustainability issues.

① More information in section [6.1. Good governance, corporate ethical culture and solid compliance architecture](#) of this Report.

This governance system is based on a number of policies and strategies that guide our activities and our decision making, and that lay the groundwork to ensure that sustainability is integrated at every stage of our value chain. These include, in particular, our Sustainability Policy, which comprises the principles adopted by the Group in relations with our stakeholders, encouraging integrating sustainability practices into the business model with the premise that all its activities will be

The commitment to sustainability by the governing bodies and the entire Company is crystallised in the definition of ambitious goals and specific targets, linking the variable remuneration of different areas within the Group to sustainability objectives.

Specifically, up to 15% of the CEO's variable remuneration is linked to compliance with sustainability policies. In addition, 25% of the 2021-2024 long-term incentive scheme for members of the management team and other key employees is based on the achievement of sustainability metrics. The variable remuneration of all office employees also factors in sustainability metrics.

Contribution to sustainable development

When the 2030 Agenda for Sustainable Development was approved in 2015, at Inditex we aligned our sustainability strategy with its 17 Sustainable Development Goals (SDGs) and 169 targets, mindful that only by achieving all of them will be possible to eradicate poverty in all its forms, reduce inequalities

and stop climate change. This alignment has given us a holistic view of our impacts and the opportunities for promoting sustainable development and collaboration in the communities in which we operate.

In this regard, this report includes detailed information on our contribution to the SDGs, indicating at the beginning of each chapter those goals on which the actions outlined in them have an impact, as well as a quantitative summary of the main indicators that show our contribution in accordance with the

guide entitled *Business Reporting on the SDGs: An Analysis of Goals and Targets*.

① More information in section [7.1.6 Inditex's contribution to the SDGs. Main indicators](#), of this Report.

Inditex's contribution to the SDGs. Key milestones in 2022

SDG 3 GOOD HEALTH AND WELL-BEING

Our commitment to promoting workplace safety, health and well-being is at the heart of Inditex's activities. This is enshrined in our Health and Safety Policy, updated in 2022.

We extend this commitment to all workers in our supply chain. Consequently, we have implemented numerous projects in this sphere as part of our Workers at the Centre 2019-2022 strategy. Notable in this regard is our work throughout this year to study, in collaboration with other stakeholders, the feasibility of expanding the International Accord for Health and Safety in the Textile and Garment Industry to Pakistan.

We have also contributed to improving the health and well-being of more than one million vulnerable people worldwide through our partnerships with Médecins Sans Frontières, Medicus Mundi and Every Mother Counts.

SDG 5 GENDER EQUALITY

Gender equality and women empowerment are a part of the essence of our Group. That is why we promote inclusive working environments that are free of any kind of discrimination. Accordingly, in 2022, the Global Sexual Harassment and Sex or Gender Identity-Based Harassment at the Workplace Prevention Policy was approved.

In addition, we have exceeded our target for women's representation on the Board of Directors, reaching 45.45% in 2022.

Our commitment to gender equality also extends to our supply chain, with numerous initiatives deployed as part of our Workers at the Centre 2019-2022 strategy.

Also notable are our partnerships with organisations such as Every Mother Counts, Water.org and Entreculturas as part of our Corporate Community Investment programme.

SDG 8 DECENT WORK AND ECONOMIC GROWTH

At Inditex we prioritise nurturing stimulating, stable and safe working environments, in which equal opportunities and professional development are a reality for all, from our own people to workers in the supply chain.

Thus, in 2022 we culminated our Workers at the Centre 2019-2022 strategy, which over the past four years has benefited 2.5 million workers through its multiple projects and initiatives, developed in partnership with multiple local and international organisations.

Furthermore, we continue to promote the employment of people in or at risk of social inclusion through initiatives such as for&from, Salta and the employment programme with Caritas.

SDG 12 RESPONSIBLE PRODUCTION AND CONSUMPTION

Sustainability, as a cornerstone of our business model, implies promoting responsible consumption and production practices.

In 2022, we signed a three-year commitment with Infinited Fiber Company, for more than 100 million euros, to purchase 30% of the future production volume of Infinna, a textile fibre produced entirely from discarded garments and part of our open innovation platform Sustainability Innovation Hub.

This year we also continued to ramp up our consumption of preferred raw materials, reaching 60% of total raw materials consumed.

In addition, this year we have allocated 22.5 million euros to projects that have had this SDG as their main objective, highlighting the renewal of our collaboration with Caritas to strengthen the Moda Re-initiative for the collection and reuse of clothing.

SDG 13 CLIMATE ACTION

At Inditex we are committed to fighting against climate change. With this in mind, in 2022 we signed up to the new targets set by the United Nations Fashion Industry Charter for Climate Action. This framework encompasses commitments in areas such as emissions and raw materials.

This year we also fulfilled our commitment to renewable energy, with 100% of the electricity consumed in our facilities coming from renewable sources.

In addition, mindful of the importance of working with our suppliers in this matter, in 2022 we rolled out the environmental improvement plan to promote improvements in production processes and facilities for a better use of resources, reducing their water and energy consumption.

SDG 17 PARTNERSHIPS FOR THE GOALS

Partnerships are key to achieving the Sustainable Development Goals and moving towards the sustainable transformation of our sector. We therefore continue to focus on collaboration, developing projects and initiatives in conjunction with numerous local and international organisations, trade unions, governments and academic institutions, among others. Particularly significant are our partnerships with the International Labour Organization, IndustriALL Global Union, UNI Global Union, ACT (Action, Collaboration, Transformation), Fashion Pact, and Cáritas, among others.

Other notable contributions

In 2022 we have taken part in various initiatives whose primary or secondary objective is to contribute to ending poverty. We have implemented these projects in collaboration with various non-profit organisations such as Entreculturas (Colombia, Ecuador, Venezuela, Brazil, Lebanon and Mexico), UNHCR (Ukraine) and Fundatia Hope and Homes for Children (Romania), among others.

As part of our community investment programme, we have worked throughout the year with organisations such as La Mie de Pain (France), FESBAL (Spain) o Fe y Alegría (Paraguay) on various initiatives aimed at eradicating hunger.

At Inditex we believe it is essential to promote our employees' professional development through training and internal promotions. Evidence of this is that 59% of the Group's vacancies were covered in-house in 2022. In addition, we have continued to be engaged in projects to promote access to primary and secondary education with the NGO Entreculturas, as well as university education in partnership with the universities of Tsinghua, Dhaka or A Coruña, among others.

In 2022, we made further headway on our commitment to reducing water consumption in our supply chain by 25% in 2025. We have also joined forces with the organisation Water.org to launch a new programme, Water and Climate Fund, which aims to develop projects to improve water and sanitation infrastructure, boosting efficiency and savings, and enhancing local communities' access to water.

This year we achieved our target of 100% renewably sourced electricity consumption at our facilities. We continue working on the promotion of renewable energies through projects that generate additionality to the grid, such as the VPPA (Virtual Purchase Power Agreement) signed this year and Outer Port Wind Facility in A Coruña, which is scheduled to enter into service in 2025.

Innovation is a key part of our business model and it is essential to achieving lasting industry transformation in spheres such as sustainability. We have therefore continued to promote the Sustainability Innovation Hub, collaborating with various start-ups in the search for new solutions, materials and manufacturing processes.

Within the framework of our Corporate Community Investment programme, this year we carried out numerous projects aimed primarily at reducing inequalities, most notably partnerships with organisations such as UNHCR, Red Cross, Entreculturas and Cáritas. In 2022, our investment in these initiatives amounted to 17.8 million euros.

In 2022, we worked on projects with various organisations focused on helping to achieve this goal, such as Spain's Reina Sofía National Museum of Art and Galician Symphony Orchestra or Portugal's Fundação de Serralves.

In 2022 we subscribed to the Arctic Corporate Shipping Pledge, promoted by Ocean Conservancy, that pushes for a commitment to avoid shipping routes through the Arctic due to the potential impact on the ecosystem. This year, we also began marketing a detergent that helps to reduce microfibre shedding from garments during washing, thus preventing their discharge into water systems.

In 2022, we teamed up with various organisations to develop a project to promote regenerative practices in India. As part of this objective, we also signed an agreement with WWF to carry out projects to restore forests and other ecosystems that serve as habitats for endangered species.

Inditex has a robust corporate governance and compliance system aimed at showing our firm commitment to good governance and social and environmental sustainability, and conveying that corporate ethical culture to all our stakeholders.

4.1.1.Human Rights

① More information in the Human Rights Report, which is available on the Inditex corporate website.

Inditex has inseparably linked its journey to the promotion of and respect for human rights and, to this end, we have a human rights strategy aligned with the United Nations Guiding Principles on Business and Human Rights. The strategy extends to all Group operations and structures our commitment and alignment with best practices throughout the value chain.

Our human rights strategy is structured on the following three pillars:

Inditex's human rights strategy

Integrating the promotion of and respect for human rights throughout our value chain

Policy on Human Rights
Approved by the Board of Directors in 2016. It applies to the entire Group.

Due Diligence
/ Identifying potential impacts arising from operations and relationships.
/ Prioritising impacts.
/ Integration of the results in processes.

Grievance mechanisms
Underpin the identification of potential impacts and help strengthen aspects of the due diligence process.

Policy on Human Rights.

Inditex advocates **respect for human rights in all its operations**, a principle that is ingrained in its business strategy and fully integrated throughout the corporate model.

A clear example of this is the Policy on Human Rights, approved by the Board of Directors in 2016, which represents the first pillar of our strategy. This Policy is binding upon the entire Group and its employees and extends to any person having dealings with the Company. It is based on the Universal Declaration of Human Rights, and on the main conventions of the International Labour Organization and the Guiding Principles on Business and Human Rights, among others, and embodies Inditex's commitment to the values that these frameworks represent.

For prioritisation purposes, the Policy also identifies the rights

most directly connected with the business model.

Policy on human rights

Respect for all universally recognised human rights
Prioritisation of rights most closely related to the business model:

Non-labour human rights
/ Respect for minorities' and communities' rights.
/ Right to privacy.
/ Right to health.
/ Right to freedom of opinion, information and expression.
/ Right to security of the person.
/ Contribution to the fight against corruption.
/ Right to the environment and to water.

Labour human rights
/ Forced or compulsory labour is rejected.
/ Child labour is rejected.
/ Discrimination is rejected and diversity is promoted.
/ Respect for freedom of association and collective bargaining.
/ Protecting workers' health and safety.
/ Just, fair and favourable working conditions.

For comprehensive integration of respect for human rights throughout the Company, we consider that **collaboration and communication are key**. Every department implements its own specific actions in this regard, bonded together by the corporate human rights strategy. This integration permeates the entire Company.

The Board of Directors is the body responsible for approving the policy on human rights. The Board has a Sustainability Committee, an informative and consultative body, responsible for promoting the commitment to human rights, among other matters. The Board also has an Audit and Compliance Committee responsible for monitoring and assessing financial and non-financial risks, including human rights-related risks.

The Group also has a Social Advisory Board, a collegiate body integrated by external independent experts, which advises on human rights, among other issues linked to sustainability.

① More information in section [6.1.1. Good Corporate Governance](#), of this Report.

Due diligence in human rights

Our approach is based on developing **due diligence processes** to detect the potential impacts of our activities on human rights. By means of continuous interaction with our stakeholders and sustainability teams on the ground, these processes are kept permanently up to date. The due diligence processes that are part of the human rights strategy involve two main focus areas:

/ Supply Chain. Considering our business model, our supply chain is one of the priority areas of our overall value chain, in which we place a special focus on the promotion of and respect for workers' human rights. Based on the due diligence process accompanied by the organisation Shift, we drew up

our strategy **Workers at the Centre 2019-2022**, focused on the socially sustainable management of the supply chain. The due diligence process identified the seven priority impact areas into which the strategy is structured: worker participation; living wages; gender, diversity and inclusion; occupational health and safety; protection of migrants and refugees; social protection; and protection of labour rights in the production of raw materials.

① More information in section [5.6.2 Workers at the Centre](#) of this Report.

/ Value chain. In keeping with the Guiding Principles, we extend the human rights strategy throughout the entire value chain. The design of these due diligence processes involves the different areas of the Company, such as Human Resources and Risk Management, and it is constantly reviewed and updated. At the same time, we carry out a range of activities to identify potential impacts, prevent them and mitigate them by means of integrating responsible practices into our activities in order to uphold human rights.

Key elements for due diligence

Communication and cooperation with stakeholders

Cooperation and collaboration are essential components of the due diligence process. Thus, there is no overstating the key importance of the relationships we forge with international organisations and NGOs, among other experts in the field and who support us in developing specific projects, training and creating and implementing our strategies. A clear example of this is our partnership with Shift, a leading centre and promoter of the Guiding Principles on Business and Human Rights. This organisation also coordinates and organises the Business Learning Program, a space in which to share practices and learning in connection with fostering human rights at companies in various sectors, in which Inditex also takes part. We also highlight our partnerships with the International Labour Organization, the UNI Global Union, IndustriALL Global Union and the UN Global Compact.

Awareness and training

Awareness is the cornerstone for a human rights culture to flourish throughout the organisation. This culture is communicated both internally to the Company's employees, and externally to suppliers, manufacturers and other stakeholders. Particularly in the supply chain, training is complemented by our work on responsible purchasing practices, with the aim of aligning commercial teams with our commitment to sustainability and human rights.

For example, in 2022, under the umbrella of the Sustainable Fashion School, the commercial and design teams have received training that includes specific topics on human rights and their potential impacts related to the business model.

Our aim is to integrate responsible and ethical practices into everything we do, both internally and in our relations with third parties, for the promotion of and respect for human rights of all our employees and anyone we come into contact with in the course of our business.

Grievance mechanisms

Grievance mechanisms, the third pillar of the human rights strategy, are key to improving the due diligence process, as their information helps identify potential negative impacts, and allows the Company to react and mitigate any risk in advance.

Our main grievance mechanism is the Ethics Line, which is available both to Inditex staff and to third parties with a legitimate interest. This channel enables queries and communications related to the interpretation of and compliance with the internal rules of conduct to be sent, in the strictest confidentiality and even anonymously, to the Ethics Committee so that it can analyse them and adopt any necessary measures.

① More information in section [6.1.3. Compliance and criminal risk prevention systems](#) of this Report.

Another important mechanism is the one established under the umbrella of our Global Framework Agreement with the international trade union federation *IndustriALL Global Union*. Thanks to the Global Framework Agreement, in force since 2007 and whose fifteenth anniversary took place in 2022, we reach out to workers in the supply chain through their representatives to promote social dialogue. The aim of the Framework Agreement is "to guarantee respect for human rights in the social and labour environment by promoting respect for labour standards throughout the Inditex supply chain".

① More information in the *Workers at the Centre Report*, which is available on the Inditex corporate website.

4.2. Stakeholder engagement

GRI 2-29; 3-1; 3-3

How and with whom we collaborate

Our stakeholders are those entities or groups that are related to Inditex, both throughout our value chain and in the communities in which we carry out our activity and which, at the same time, have the capacity to influence our Company with their decisions and opinions. In this regard, we identify and group our stakeholders according to their link to our business model. Thus, our main stakeholders are: customers, employees, suppliers, shareholders, the community as a whole and the environment (represented by various environmental organisations).

The principles on which our relationship with stakeholders is based are enshrined in our Sustainability Policy. The first of these is **transparency**, which helps us to establish a bond of trust with them. The second is **continuous dialogue**, which allows us to respond to their demands and needs, as well as to join forces to achieve common and shared objectives, such as circularity, preserving the planet and its resources, or promoting human and labour rights.

These common principles are embodied in specific strategies, objectives and communication and dialogue channels, which are constantly reviewed and updated. Thus, we have policies that define the principles of the relationship with each stakeholder group, such as our Code of Conduct and Responsible Practices, our Code of Conduct for Manufacturers and Suppliers or the Policy on Human Rights, among others.

Defining the stakeholder engagement strategy

Identification

Identification of all the stakeholders that may have dealings with Inditex throughout the value chain and in the environment in which we operate.

Prioritisation

Classification and determination of priority stakeholders based on our business model and value chain.

Definition of the strategy

A specific strategy is defined for each group of stakeholders, defining objectives, commitments and dialogue tools.

Common elements of all the strategies:
Permanent dialogue and transparency

Inditex's main stakeholders and engagement and dialogue tools

Inditex's main stakeholders

Examples of stakeholders

Employees

Any person who works at Inditex.

/ Store employees
/ Office employees
/ Logistics centres employees
/ Union representatives

Customers

Any person who purchases any product sold by the various brands of the Inditex Group.

/ Physical store customer
/ Online store customer
/ Potential customer

Suppliers

Companies that are part of Inditex supply chain and their respective employees.

/ Direct suppliers
/ Manufacturers
/ Workers
/ Trade union organisations
/ International organisations

Community

All those persons or entities that form part of the environment in which Inditex carries out its activity.

/ NGOs
/ Governments and public authorities
/ Academic institutions
/ Civil society
/ Media

Environment

Set of natural elements present in the environment in which Inditex develops its business model.

/ Environmental protection organisations
/ Governments and public authorities

Shareholders

Any person or entity who owns shares in the Inditex Group.

/ Institutional investors
/ Individual investors

■ Constant dialogue ■ Biannual ■ Annual ■ On demand

Relationship and dialogue tools

Common	Specific
 Sustainability Committee	- Ethics Committee ■ Agreement with UNI Global Union ■ Internal training and promotion ■ Internal communication ■ Volunteer programmes ■ Departments of Information Security and Data Protection and Privacy
 Materiality Analysis	- Teams specialising in customer service ■ Physical and online stores ■ Social media ■ Departments of Information Security and Data Protection and Privacy
 Social Advisory Board	■ Supplier clusters - Ethics Committee ■ Sales and sustainability teams ■ Framework Agreement with IndustriALL ■ Global Union Department of Information Security and Data Protection and Privacy
 Strategic partnerships	■ Social Advisory Board ■ Commitments to NGOs ■ Sponsorships and Patronage Committee
 Corporate Website	■ Social Advisory Board ■ Commitments to NGOs ■ Sustainability teams
 Integrated report	■ Annual General Meeting ■ Sustainability indices ■ Investor relations

Our commitments

Common	Specific
                	/ Respect for Human and Labour Rights / Fair and decent treatment / Respect for privacy and personal data protection / Commitment to information security
	/ Clear and transparent communication / Integration throughout the business model / Responsible design and manufacturing / Respect for privacy and personal data protection / Commitment to information security
	/ Promotion and protection of core human and labour rights and international standards / Promotion of sustainable production environments / Respect for privacy and personal data protection in the provision of services
	/ Contribution to social and economic development / Commitment to improving global welfare
	/ Respect for the environment / Conservation of biodiversity / Sustainable management of resources / Stopping climate change
	/ Social interest and interest common to all shareholders / Fostering informed engagement

Outstanding relationship and dialogue tools

We have had a Sustainability Committee since 2019. It is a delegated committee of the Board of Directors, whose responsibilities include the supervision of our stakeholders' engagement in the sustainability field.

On the other hand, since 2002 we have had a Social Advisory Board which acts as an advisory body on sustainability matters, and comprises independent external members, whose responsibilities include arranging and institutionalising dialogue with key stakeholders in civil society.

① More information in section [4.2.2 Materiality analysis](#) of this Report.

Furthermore, we have established various strategic partnerships for collaboration with stakeholders to contribute to sustainable development throughout our value chain and in the communities where we operate.

① More information in the document *Partnerships* available on Inditex's corporate website.

Note that the Group conducts an annual materiality analysis in order to identify and respond to those issues that are most relevant to our stakeholders. The findings of this analysis are a very valuable source of information, as they enable us not only to discover their needs and expectations, but at the same time serve as a guide to define our priorities as we progress in the creation of economic, social and environmental value.

① More information in section [4.2.2 Materiality analysis](#) of this Report.

4.2.1. Partnerships

GRI 2-6; 2-16; 2-28; 2-29; 3-1

At Inditex we consider it essential to establish close and multi-directional partnerships with various organisations and institutions. In our view, only by joining forces with key players can we advance in the sustainable transformation of our sector in particular, and of society and the planet in general

Consequently, we maintain partnerships with governments, trade unions, academic institutions, local and international organisations and representatives of civil society, among others, to progress in sustainable development. Accordingly, we maximise our contribution to the SDGs and foster economic, social and environmental value creation.

In the last year, in addition to maintaining the strong partnerships of previous years, we have established new ones such as with Ocean Conservancy, Disability:IN and WWF, to name but a few.

① More information in the document *Partnerships* on Inditex's corporate website.

Partnerships

Positive Impact on the **people** in our value chain and on the community

Protecting the **environment** and fighting against climate change

Transversal partnerships with **social, environmental and governance** impact

4.2.2. Materiality analysis

GRI 2-4; 2-12; 2-29; 3-1; 3-2; 3-3

In 2022, for the twelfth consecutive year, we performed a materiality analysis to understand the needs and expectations of our stakeholders. This exercise enables us to identify and prioritise the issues that are most relevant, both to internal stakeholders, i.e., our employees, and external stakeholders, i.e., international bodies, trade unions, NGOs, universities, local communities and suppliers, among others.

This analysis has a dual purpose. On the one hand, it enables us to identify the priorities we need to focus on in order to make progress in creating value for our stakeholders and ensure that our sustainability strategy is aligned with their needs. On the other, it helps us to determine the content to be included in this Report.

In 2022, we updated the methodology used to conduct our materiality analysis, which has a dual focus: **impact materiality**, which analyses the organisation's potential impacts on the economy, environment, and people, and **financial materiality**, which analyses how these same issues impact the Organisation. Thus, we conducted a dual materiality exercise.

To determine impact materiality, we follow the recommendations outlined by the Global Reporting Initiative in its GRI 3: Material Topics 2021 standard, which updates the methodology previously recommended in the GRI 101: Foundation 2016 standard, focusing the analysis on the significance of the Company's actual and potential impacts on the economy, the environment and people, including on human rights. According to this methodology, the materiality of impacts is determined by assessing the following parameters:

/ **Scale:** how grave or beneficial the impact is or would be.

/ **Scope:** how widespread the impact is, for example, the number of individuals affected or the extent of damage.

/ **Irremediable character:** when the impact is negative, how hard it is to counteract or make good the resulting harm.

/ **Likelihood:** for a potential impact, the chance of the impact happening. In determining this, short, medium, and long-term perspectives are taken into consideration.

In addition to this exercise, we conduct an assessment of the financial materiality of each impact in order to maintain a **dual perspective of materiality** in our analysis, in line with best practices in this area. To determine financial materiality, we survey our employees (internal stakeholders) to determine the financial scale of the impacts identified for Inditex, based on the effect they may have on future cash generation or on the Company's value in the short or medium term.

The result of this exercise is a materiality matrix where, based on the importance of its impact on the environment (x-axis - impact materiality) and its relevance for the development of the Company's business model (y-axis - financial materiality), 18 topics are shown, two fewer than last year. Both impact materiality and financial materiality are rated on a scale of zero to four points.

The decrease in the number of topics is due to the change in methodology compared to 2021, as by starting the analysis from a more granular impact perspective, impacts related to the two topics not included in this year's matrix - customer orientation and diversity, equality and inclusion - have been grouped into other topics. In particular, impacts such as pay inequality, diverse workforce and inclusive work culture, or those related to harassment and discrimination are key impacts that are now part of the quality of employment and human rights topics. In other words, these impacts continue to be material, but they have been included in other material topics.

① More information in section [7.2.3. Balance of material topics](#) of this Report.

Process to develop Inditex's materiality matrix

Identifying the potential and actual impacts

that Inditex has on the economy, the environment and people, including on human rights, taking as a reference:

- / Issues addressed by stakeholders over the course of the year
- / Current and future applicable legislation
- / Topics highlighted in the benchmark reporting standards
- / Material topics at other companies in the sector
- / Issues addressed in our Ethics Line
- / Trends in the industry
- / Criteria considered by financial analysts
- / Analysis of Social and Digital Media

Importance of the impacts

obtained by calculating the variables:

Scale

Evaluated by surveying:

- / internal stakeholders
- / external stakeholders*

Scope, Irremediable Character and Likelihood

Evaluated through interviews with members of Inditex Management and heads of relevant areas.

Financial materiality

Impact on the Company's cash generation and value creation

Evaluated through surveys to employees.

Prioritising impacts

based on their significance.

Grouping the identified impacts into 18 material topics.

Verification of the results both internally, by the Company's management and the Sustainability Committee, and externally, by the Social Advisory Board.

*In 2022, representatives from more than 80 organisations of different kinds took part. The participant organisations include, among others: The Inditex Social Advisory Board, Accelerating Circularity, Asociación Española de Contabilidad y Administración de Empresas (AECA), AFIRM Group, Caritas, Better Work, Centre for Business and Public Sector Ethics of Cambridge, Red Cross, Ethical Trading Initiative, Fashion for Good, Entreculturas, Fundación SERES, Red Española del Pacto Mundial de Naciones Unidas (United Nations Global Compact), Greenpeace, Humane Society of the United States (HSUS), IndustriALL Global Union, Médicins Sans Frontières (MSF), Medicus Mundi, Organic Cotton Accelerator (OCA), University of Cambridge, University of A Coruña, and University of Santiago de Compostela.

5. Committed to

5.1. Our people / 5.2. Our customers / 5.3. Our products /
5.4. Our shareholders / 5.5. Environment / 5.6. Suppliers /
5.7. Communities

Inditex is a company committed to its stakeholders: its people, customers, shareholders, products and surrounding environment, from suppliers to the communities where we operate.

5.1. Our people

GRI 2-7; 3-3; 404-2

Related material topics: Stakeholder engagement; Quality of employment; Human rights; Safe and healthy environments; Talent management.

A career at Inditex is more than a job: it is a lifestyle packed with goals, opportunities and continuous inspiration.

Our purpose is to make a positive impact on the lives of millions of people, starting with those that make up our team, which comprises 182 nationalities. We want Inditex to be the ideal place for passionate, curious, entrepreneurial, motivated and responsible people; a place for them to continue to grow as part of a creative and innovative team.

To achieve this, our entire people strategy is grounded on four cornerstones: promoting our **values** and our **culture**, characterised by **diversity**, **inclusion** and **equal** opportunities; maximising our commitment to **talent**, always providing opportunities for learning and professional growth; guaranteeing **high quality**, stimulating and stable jobs; and protecting the **safety, health and well-being** of our teams.

5.1.1. Diversity, inclusion, equality and work-life balance

GRI 2-7; 3-3; 401-3; 404-2; 405-1; 405-2; AF23; AF27; AF32

5.1.1.1. About us

At the end of 2022, our Group comprised a team of **164,997 people, located in 60 different markets and representing a total of 182 nationalities** (165,042 people, 60 markets and 177 nationalities in 2021; 144,116 people, 60 markets and 171 nationalities in 2020; 176,611 people, 60 markets and 172 nationalities in 2019; 174,386 people, 60 markets and 154 nationalities in 2018).

The Inditex Group can be described with four features:

- / Generational and gender diversity
- / International presence
- / Horizontal organisation
- / A customer-centric approach

Generational and gender diversity, along with **the empowerment of women**, are hallmarks of who we are in the Inditex Group. At the end of 2022, **75% of our workforce are women**, while 25% are men (76% and 24% in 2021, 2020 and 2019, and 75% and 25% in 2018, respectively). Moreover, our teams **comprise employees of different generations**, the youngest groups being the largest, as evidenced by the average age of our workforce, which is 29.6 years old (29.3 years old in 2021, 30.1 years old in 2020, 28.9 years old in 2019 and 28.7 years old in 2018).

With employees in over 60 markets, Inditex's **international presence** is another of our greatest strengths. On the one hand, it enriches our team management by allowing us to apply global policies while at the same time addressing the different local realities; and on the other hand, multiculturalism makes us a more creative company, geared to understand the market's complexities. Spain, with 46,154 employees, accounts for 28% of the total workforce.

Thirdly, our **horizontal organisation** favours open and continuous communication throughout the workforce, as well as collaborative work. This permanent dialogue enables us to better understand our business and identify opportunities for improvement in all areas and at every level. In addition, our approach to job classifications is broad, with store employees having a special relevance in all of them.

Lastly, our **customers are at the heart** of our business model. Accordingly, our stores, where 86% of our people work, play a paramount role in the Company. In recent years our online teams have also grown strongly. The rest of the Group's areas of activity (factories, logistics and central services) provide services to the integrated store and online platform of all seven of our brands, which make up a seamless network of over 5,800 stores.

5.1.1.2. Our commitment to diversity and inclusion

At Inditex **we design opportunities for everyone**. Our teams are composed of people of different sex, gender identity and expression, sexual orientation, race, ethnicity, age, education, socio-economic status, disability or religion, among other characteristics.

We know that having diverse teams supported by an inclusive corporate culture that fosters equality of opportunities and applies a zero tolerance approach to discrimination makes us a more competitive, creative and innovative company. A company with more tools to understand the broad diversity of the market and to be able to anticipate all its fashion needs.

At Inditex we are committed to building diverse teams of people that drive our business performance and pave the way for us to achieve our corporate objectives. All this is grounded on values such as **inclusion, equality and respect**, which are the foundations for each person to be able to freely develop all their potential and achieve their professional goals.

The Group nurtures this **inclusive culture** and keeps it updated through the following commitments:

- / Guaranteeing balanced diversity of profiles for all job descriptions and at all levels by attracting and retaining talented professionals.
- / Always ensuring equality of opportunities for our people regardless of their sex, gender identity, race, ethnicity, origin or different abilities, among other characteristics.
- / Fostering collaboration and respectful communication between people and promoting respect for human rights, both inside and outside the Company.
- / Developing procedures and implementing appropriate initiatives and training programmes to achieve these goals.

In keeping with this corporate culture, in December 2020 the Board of Directors agreed to the update of **Inditex Diversity and Inclusion Policy**, previously approved in 2017. This Policy is derived from the Company's Code of Conduct and Responsible Practices, whose basic tenets are, among others, **respect,**

acceptance and equality, and it is also consistent with the Group's Compliance and Human Rights policies. One of the main aims of this Policy is to ensure that there is no discrimination of any kind, particularly on grounds of gender, in any position and in particular when appointing members of the Board or Senior Management.

Hence, the Diversity and Inclusion Policy **guides all our areas of action**, in particular with respect to people management: recruitment and selection, remuneration and benefits, promotion, training and professional development. Likewise, the policy also directly impacts areas linked to our relations with people in our business model: customer services, marketing and communication, procurement, etc. In summary, this Policy applies to anyone associated with the Group, whether they are employees, customers or third parties such as contractors, suppliers, professionals involved in recruitment processes or people working in the supply chain.

At the same time, Inditex's staff are responsible for promoting **diverse and inclusive workplaces** that ensure equal opportunities and foster collaboration and respectful communication between people, both inside and outside the Company. All the Group's areas, departments and subsidiaries are responsible for the proper implementation and application of these mandates on diversity and inclusion.

Within the Human Resources Team, the Department of Diversity, Equality and Inclusion ensures compliance with the Diversity and Inclusion Policy, and fosters training initiatives and programmes in this regard within the Group. Inditex also has an Ethics Committee and an Ethics Line to ensure compliance with this Policy, which receives and addresses all the comments, doubts or complaints made in good faith regarding the interpretation, application or enforcement of the Policy.

① More information in section [6.1.3. Compliance and criminal risk prevention system](#) of this Report.

Two e-mail inboxes have been set up: one for queries regarding the interpretation of our Policy (d&i@inditex.com) and another to report complaints concerning its interpretation, application or compliance (canaletico@inditex.com); there is also access to the people from Human Resources and the Diversity Champion in our markets and concepts.

5.1.1.3. Global initiatives to promote diversity and inclusion

As a **markedly international company**, we devised the diversity and inclusion (D&I) project from a global perspective, and implemented it across all our markets, which are a source of diversity and multiculturalism. And our people are at the heart of this project, transmitting our culture of inclusion and respect.

Accordingly, since 2018 we have appointed **Diversity Champions** among our staff in the various subsidiaries. Their mission is to act as diversity and inclusion coordinators in their countries and workplaces to ensure that our Diversity and Inclusion Policy is implemented, as well as to contribute ideas and projects that feed into our strategy. At present, more than 50 Champions carry out that role, since in 2022 Champions have now been designated at the headquarters of all the commercial brands. Within the framework of Champions in Europe, meetings were held in Paris, Sarajevo and Budapest in 2022 with the aim of advancing D&I commitments and projects and actively contributing to fulfilment of our cornerstones.

Also in Europe, 12 of our subsidiaries (France, Germany, Croatia, Romania, Slovenia, Italy, the Netherlands, Sweden, Greece, Portugal, Poland and Bulgaria) and our Brussels office have signed up to the **Diversity Charter** in their respective markets. This Charter, a European Commission initiative to foster diversity management and inclusion in all organisations, enables our local teams to exchange best practices and to interact with other companies and charitable entities in this regard.

Moreover, in the United States, in 2019 we signed up to the **Open to All** campaign, an initiative encompassing more than 200 companies and charitable entities whose aim is to promote the idea that everyone must be welcome in public retail spaces, regardless of their race, ethnicity, nationality, gender, sexual orientation, gender identity and expression gender identity and expression, migratory status, religion or disability, among others.

We work on the following **four global priorities**, as well as establishing local initiatives in our various subsidiaries:

- / Gender equality
- / Disability inclusion
- / LGBT+ inclusion
- / Socio-ethnic inclusion

In recognition of our work on diversity, in 2022 Inditex featured for the fourth consecutive year in the Financial Times **Diversity Leaders** Index, which includes the 850 leading companies in the field of diversity and inclusion in 16 countries, chosen from over 15,000 companies across Europe.

At the country level, it is worth highlighting that in 2022 Inditex ranked in the Top 10 among more than 230 leading companies in the first edition of the **Excellence in Diversity & Inclusion Awards** in China.

① More information in section [3.4. Recognitions](#) of this Report.

5.1.1.3.1. Gender equality

Gender equality is at our core. We nurture **diverse and inclusive working environments** in which **all our workforce can develop their professional potential**. And, in particular, in which women, who account for **75%** of that workforce, feel supported in their professional development, free of any discrimination that may deprive them of enjoying the same opportunities as men.

To guarantee equality, we promote the transversality of our training and development tools (TraIn, Leap&Co or Talks), as well as the transparency of our internal promotion tool (InTalent), which enable us to ensure availability and objectivity in the Company's promotion processes.

In terms of awareness, in March, various dissemination campaigns were again held on the occasion of **International Women's Day**, in which the core message was that of empowerment, especially in those sectors where women have historically been under-represented.

Cultivating **women's talent** has enabled us to make solid progress in regard to their leadership within the Group: in 2022, **80% of the Company's management positions were filled by women** (81% in 2021 and 2020, and 79% in 2019). Furthermore, in the last few years the **representation of women on the Board of Directors** has also improved notably, achieving 45.45% in 2022 (+23 percentage points since 2016). Accordingly, we have achieved our target of 40% female representation on the Board by 2022, thus complying with the recommendations of the Spanish Good Governance Code.

① More information in section [6.1.1. Good Corporate Governance](#) of this Report.

The distribution of employees by gender and job classification in 2022 is as follows:

Distribution by gender and job classification

	2022				Total
	Women		Men		
Management	8,553	80%	2,139	20%	10,692
Supervisor	10,364	70%	4,390	30%	14,754
Specialist	104,284	75%	35,267	25%	139,551
Total	123,201	75%	41,796	25%	164,997

To achieve our equality goals, at Inditex we guarantee fair access to opportunities for development at work, we promote continuous training and we strive to create safe spaces in which there is no harassment or violence against women, while also promoting wage parity.

In Spain, the **equality plans** at Inditex's different companies include measures that affect different areas of labour relations, such as selection, recruitment, promotion, training, occupational health, remuneration and work-life balance. This work is further underpinned by the committees that monitor these plans, which meet regularly to verify their compliance and effectiveness. There are also action protocols designed to prevent sexual and/or gender-based harassment.

In 2022, progress was made through social dialogue in the unification of the existing equality plans, with the negotiation of a **single Group equality plan** for store and office staff of all the brands in Spain, as well as that of Inditex, S.A. The agreement is expected to be signed in the first half of 2023. This Group plan coexists with the equality plans already in place at all our logistics centres and factories.

As a company that **rejects any kind of discrimination**, at Inditex we strive to prevent sexual harassment, abuse and sexual violence at the workplace by means of internal policies that prevent these behaviours. The **Global Sexual Harassment and Sex or Gender Identity-Based Harassment at the Workplace Prevention Policy**, approved in March 2022, improves the information and training in this area for the entire workforce. Prevention, care and support and response to victims are the main axes of this Policy.

This Global Policy also takes into account the recent approval of International Labour Organization (ILO) Violence and Harassment Convention – C190, ratified by Spain in May 2022 and entering into effect in 2023, and ILO Violence and Harassment Recommendation – R206 (June 2019). The Inditex Group establishes in this Global Policy the general principles that serve as a framework of reference for the various policies in this connection that may be approved locally in the markets where we operate.

In 2023, the Company will continue to further its commitment to protecting people in the workplace by expanding the scope of the Global Sexual Harassment and Sex or Gender Identity-Based Harassment at the Workplace Prevention Policy. Accordingly, without altering its content, the new Policy will cover any other situation of harassment at work, in any of its manifestations or types. In this regard, implementation of the Policy will be adapted to the legislation of countries where there is already a local internal policy on these matters, or where measures of this kind will foreseeably be approved.

To raise awareness and disseminate the content of this Global Policy among the workforce, adequate training will be provided, tailored to the specific characteristics of each market. As key players in detecting and knowing of especially sensitive situations, human resources and structure management teams will receive specific training.

Likewise, we highlight our commitment to stop gender violence through various campaigns to disseminate information that we conduct every 25 November, the International Day for the Elimination of Violence Against Women. In this connection, in 2013 we signed an agreement with the then Ministry for Health, Social Services and Equality of Spain to raise awareness and promote the integration of victims into the workplace. This agreement remains in force today. Within the framework of this agreement, all the human resources teams in Spain constitute an **internal Punto Violeta**⁴, receiving specific training from the Red Cross on how to tackle gender-based violence.

Furthermore, Salta, the project to promote the integration of vulnerable young people into the workplace, has also generated employment opportunities for the victims of gender violence. This project has been rolled out in Spain, France, Italy, Greece, Germany, UK, Poland, Portugal, Mexico, Brazil, USA, South Korea, Türkiye, India, Kazakhstan and Romania.

① More information in section [5.7. Communities](#) of this Report.

With regard to other equality-related labour measures, in 2022, a job assessment and a salary audit of the workforce were performed by external suppliers, and a remuneration register was set up to guarantee the principle of **pay transparency** and equal pay for work of equal value. This remuneration register showed that there is no gender-based pay discrimination in jobs of equal value.

⁴ "Purple Dot", an initiative to create a network where people suffering or witnessing gender-violence situations can reach out for help, as well as to accompany and care for victims.

Likewise, in 2022 we have also continued to implement work plans and monitoring and assessment systems to foster gender equality and women empowerment in our workplaces. And we have continued to pursue our **GEEIS (Gender Equality European and International Standard)** certification strategy across our various subsidiaries. The GEEIS recognises those companies and workplaces that are actively engaged in building a fairer society, based on equality between men and women and on diversity and inclusion as the pivotal values of their policies.

In 2022, both the Group at the global corporate level and our Belgian subsidiary renewed their GEEIS certification for another four years, and obtained the GEEIS-DIVERSITY label for the first time, audited by Bureau Veritas. Likewise, the Nordic hub (Norway, Denmark and Finland) have obtained GEEIS certification, joining Sweden, which obtained it in 2020. They join Germany, Bulgaria, Ukraine and Russia, which received certification in 2021, and France and Italy, certified in 2020 and passing their intermediate assessment this year. This certification plan, which will continue to advance in the next few years, is enabling us to consistently and continuously deploy our gender equality policies in our various markets.

Moreover, since 2019 we have had a guide to inclusive language to help our teams communicate more equally in the workplace.

We also foster equality, diversity and inclusion among the workers in our supply chain. For the latter purpose, we have a Gender, Diversity and Inclusion strategy, within the framework of which a number of actions are carried out aimed at the workers from our suppliers and manufacturers.

① More information in section [5.6.2. Workers at the Centre](#) of this Report.

In recognition of these efforts to implement initiatives that foster gender equality globally, in January 2023, Inditex was included for the fourth year running in **Bloomberg's Gender-Equality Index**, which features the companies that are most committed in this respect. Similarly, the **Equileap** ranking, an analysis of nearly 4,000 companies based on 19 gender equality criteria, highlights Inditex in its 2022 report as the only Spanish company that carries out gender audits.

① More information in section [3.4. Recognitions](#) of this Report.

Women in Tech: science and technology from an inclusive perspective

Women in Tech was established in 2020 as an internal initiative aimed at boosting the presence of women in technology to foster the values of diversity and inclusion and generate an impact on the Organisation and on society as a whole. To achieve this aim, this initiative is grounded on two pillars: the need to influence society, supporting actions that encourage girls to take an interest in science and technology; and the impact on women in the world of technology through actions that empower them.

Over this period, we have held several sessions and masterclasses to encourage talented women to pursue careers in Science, Technology, Engineering and Mathematics, and to increase the presence of women performing digital and technological duties. Against this backdrop, various initiatives have been introduced in connection with dissemination: talks with leading women in technology, as well as training and awareness-raising projects in schools and universities, and we have held information activities to celebrate the International Day of Women and Girls in Science.

We have also actively collaborated with organisations working to train and empower girls in the technological area. One of the latest initiatives has been our collaboration with Power to Code, ambassadors of Technovation in Madrid. Technovation is a global charitable organisation based in the United States, creators of the Technovation Girls programme, which, every year, at an event called Technovation Challenge, invites teams of girls aged 8 to 18 from all over the world to learn and develop skills for tackling real-world problems using technology. With the support of mentors, companies and volunteering parents, girls work together in teams to develop applications or artificial intelligence models that address those problems. In 2022, our teams took part in these challenges and one of the teams supported by Inditex was chosen as the European winner for the best application.

Moreover, in order to boost the professional careers of women in our teams, we have developed an internal women's leadership programme to inspire them and provide them with the necessary tools to take on positions of responsibility in the Company. We are also committed to a talent pool that promotes fairness and diversity within the technology team. In this year's Junior programmes, more than 80% of the recruits were female.

5.1.1.3.2. Inclusion of people with disabilities

At Inditex, we aim to help overcome the barriers faced by people with disabilities. Not only through fashion, seen as a tool for personal expression and well-being, but also by fostering a culture that is open to everyone.

Inditex's disability inclusion strategy is based on three priority areas:

- / Employability, direct recruitment and professional development.
- / Disability awareness and training for our people.
- / Accessible workspaces, inclusive shopping experience and cross-cutting projects.

Employability, direct recruitment and professional development

The Inditex Group is also fully committed to the inclusion of people with disabilities in the labour market. At the end of 2022, in Inditex we directly employed 1,698 people with disabilities (1,443 in 2021, 1,325 in 2020, 1,568 in 2019 and 1,498 in 2018). Moreover, in Spain, alternative measures (e.g. collaboration with special employment centres, donations and sponsorships to conduct employment insertion activities for people with disabilities) are no longer used, culminating the process of prioritising direct hiring as an integration measure. In the past, alternative measures were equivalent to 64 workers in 2021 (69 in 2020, 180 in 2019, and 186 in 2018).

There are different regulatory frameworks in the various markets where we operate, so regulations are not always comparable to the ones in force in Spain, whether due to the absence of minimum recruitment quotas or out of respect for the privacy of

individuals, with the right of citizens not to disclose their disability prevailing. As a result, in some cases we have no measured data available.

With the aim of increasing direct hires, in January 2023, Inditex announced that **it will double the number of people with disabilities in our workforce across all our markets over the next two years**; this will mean hiring an additional 1,500 people with some type of disability. Our aim is to foster the inclusion of these professionals in our network of stores, logistics centres, warehouses and offices worldwide. Inditex always aims to exceed the quotas for people with disabilities established by law in the various markets where it operates. Furthermore, where no specific regulations exist, the Group has set a target of reaching at least 2% of employees with disabilities.

This new commitment was announced by Inditex's CEO in a meeting with the Director-General of the **International Labour Organization (ILO)**, Gilbert F. Houngbo. The announcement was made after the Company joined the **ILO Global Business and Disability Network**, a global network of companies and organisations that seeks to promote the workplace inclusion of people with disabilities.

Inditex joins in the ILO's effort to contribute to an inclusive work environment, where people with disabilities have the same opportunities to access and progress in their careers, helping companies to recognise their economic and social value, boosting the inclusion of people with disabilities in the workplace, promoting accessibility in the workplace and encouraging inclusion in every aspect of working life.

INCLUYE Programme

Created in 2021 to incorporate people with intellectual disabilities into our logistics teams in Spain, the INCLUYE programme is one of the main initiatives in the sphere of socio-occupational integration of people with disabilities. This initiative already had its parallel in stores, with projects such as Pull&Bear's FRIDA, and in other countries, with the Eu Incluo project in Portugal or the Incluir project in Brazil.

In 2022, all Inditex's direct employability projects worldwide were grouped together and consolidated under the umbrella of the INCLUYE programme, which has thus broadened to ensure the sustainable and lasting inclusion of people with disabilities. Based on supported employment methodology, the programme involves:

- / Collaboration with local organisations that work to achieve the occupational integration of people with disabilities;
- / Adaptation of the position where necessary;
- / Creation of easy-to-read on-boarding and training materials;
- / Internal training for human resources teams and line managers;
- / Existence of the role of tutor—both internal and at the local entity—as a key factor for successful employability.

In Spain, this development has been possible thanks to the partnership with Plena Inclusión, a federation of entities working towards the inclusion of people with intellectual disabilities, supporting the in-store programmes of Pull&Bear, Stradivarius, Zara and Oysho, and incorporating a total of 148 people since 2019. Furthermore, the programme continued at our logistics centres, also collaborating with local organisations such as Prodis and COGAMI, recruiting 12 people with intellectual disabilities for Zara's logistics platforms in Zaragoza and Meco (Madrid) and for the TEMPE platform (Alicante), resulting from our partnership with APSA, in addition to those who already joined in the 2021 edition. At our Inditex head offices in Arteixo (A Coruña) a total of 27 people with intellectual, physical or sensory disabilities have been recruited.

Moreover, one of our most important occupational integration projects is **for&from**, a network of social franchises from our different brands, managed by charitable entities and staffed by people with various types of disabilities, offering fashion from previous seasons at competitive prices. Created with the aim of providing equal opportunities in access to employment, this initiative currently has 15 stores that have created more than 200 jobs. All profits generated by these stores are reinvested in social projects run by the partner organisations. In 2022 Zara Home opened its first for&from store in San Sebastián de los Reyes (Madrid).

Disability awareness and training

Creating an inclusive culture focused on integrating people with disabilities is key. For the third consecutive year, in November and December 2022 we held the **Impact Week**, focusing on disability inclusion, with the involvement of the vast majority of our subsidiaries, head offices and logistics centres. The aim of this initiative is to raise awareness and mobilise our workforce to continue to promote projects that foster the full inclusion of people with disabilities, be they employees, customers or candidates. By working with local entities in the various markets, as well as through training, workshops, round table discussions and other activities, this year's Impact Week focused on areas such as accessibility, 'customer' experience and 'employee' experience for people with disabilities, thereby helping to break down barriers and foster equal opportunities. In total, more than 20,000 people worldwide have taken part in one or more of the multiple local initiatives or have used the interactive global app created for this inclusive project.

Furthermore, in order to advance in this strategy of awareness-raising and collaborative work, the Group opts to maintain stable and lasting relationships with local entities in the various markets where it operates:

/ In 2022, we joined Disability:IN, the largest US organisation for the inclusion of people with disabilities in the workplace, which provides both employment opportunities for people with disabilities and resources to promote awareness and training in teams.

/ In the UK, we continue to work with the Business Disability Forum, a non-profit organisation focused on transforming the lives of people with disabilities, working together with them, along with business leaders and public institutions, to understand how to improve their life chances and experiences in employment, the economy and broader society.

/ In Belgium and the Netherlands, where there are no legal quotas in place, we have launched initiatives aimed at recruiting people with disabilities in partnership with companies specialising in inclusion and with local public entities, as well as, at training customer service teams to better cater for people with disabilities.

/ And Denmark and Sweden have followed this same path, in 2022 entering a partnership with two organisations for the recruitment of people with disabilities, which has already started to yield results.

In addition, in countries with recruitment quota regulations in place, we continue to work towards achieving recruitment targets, improving the working conditions of people with disabilities and training their teams. This is the case in Germany, where we collaborate closely with the Federal Employment Agency; France, with the Accord Handicap company agreement on disability; Italy, which has implemented the ALL IN project for the occupational integration of people with intellectual disabilities in Milan and Verona; Portugal, with its Eu Incluo project; Japan, which holds regular meetings with partner associations and staff with disabilities to review their conditions; or Romania, which every year strives to improve the internal training of its teams and the recruitment of this group, with the support of both non-governmental organisations and the Department for Social Assistance.

Accessibility and inclusive shopping experience and cross-cutting projects

One of our priorities is to comply with the principles of universal accessibility, especially in respect of any members of our staff and customers who may have any kind of disability.

Thus, we strive to ensure that all our workplaces meet the functional and dimensional requirements that allow an independent use by people with disabilities or people with impaired mobility. We also consider it a duty to make technical adaptations to workplaces that require specific modifications in terms of mobility or other types of sensory, visual or hearing disabilities.

Furthermore, it is also important for Inditex to provide equal opportunities for access to our websites and apps to people with different disabilities, to offer inclusive shopping experiences. Based on the principles of dignity, accessibility and independence, both our jobs portal—Inditex Careers, which has WCAG International Web Accessibility Certification, with AA level conformance—and the websites and applications of our commercial brands allow access to the whole range of content through functionalities adapted for people with various kinds of disability. Our aim in the online environment is to always provide accessible services to the broadest possible audience and to ensure that any person with any kind of disability may access our content.

In addition, as one of the main pillars of Inditex's Diversity and Inclusion strategy, inclusion of people with disabilities is also a feature of the Group's cross-disciplinary projects. One such example is the project for innovation in recycled threads carried out by Stradivarius. It prioritised, in addition to technical considerations and collaborative learning with local spinning mills, collaboration with social entities in the same area that work to foster the employability of people with disabilities to carry out part of the process, such as AMPANS (Santpedor) or Fundació Integra (Olort).

5.1.1.3.3. Inclusion of the LGBT+ community

Mindful of the fact that the greater diversity there is in society and in businesses, the more creative, productive and innovative they are, at Inditex we are unwaveringly committed to the inclusion of the LGBT+ community in the workplace.

Accordingly, we have adhered to some of the main initiatives in that sphere, including:

/ Since 2016 we have been a member of **Open for Business**, a coalition of leading global companies that advocate for the rights and inclusion of the LGBT+ community. From this forum, we work to prove that the more inclusive societies are, the more businesses thrive, and that companies that promote LGBT+ inclusion are more dynamic, productive and ground-breaking.

/ In 2018 we signed up to the **UN Standards of Conduct for Business: Tackling Discrimination against LGBTI People** based on the UN Guiding Principles on Business and Human Rights, and including contributions from hundreds of companies from a range of sectors.

/ In Spain, in 2018 we joined **REDI, Red Empresarial de Diversidad e Inclusión LGBT+**, an association that works to foster safe working environments that are respectful of everyone, regardless of their gender identity, gender expression or sexual orientation.

Furthermore, once again this year, between May and August 2022 several Inditex subsidiaries in Europe and North America implemented a variety of LGBT+ inclusion initiatives. They coincided with the various celebrations around International LGBT+ Pride Day, which in the wake of the pandemic have returned to some of the world's major cities. Some of our people in Belgium, the Netherlands and the UK took an active part in the marches in Brussels, Amsterdam and Manchester, while masterclasses, talks and 'good morning meetings' were held to reflect on the importance of allies in creating more inclusive work environments. Also, in France the Challenge Arc-en-ciel (Rainbow Challenge) was launched, under the slogan "Inconditionnellement nous" (unconditionally us), encouraging people to give visibility to the corporate **Love&Pride** project.

Furthermore, in the United States in 2022 we held two editions of the IN Pride project to help transgender and non-binary people access employment, focused on creating job opportunities at our stores in conjunction with two New York organisations: The Door and The Ali Forney Center. In addition, the 2022 edition of the Salta project in logistics centres in Spain has incorporated the IN Pride philosophy as a first step to growing this project.

Zara USA was also recognised as one of the 'Best Place to Work for LGBTQ+ Equality' in the **Human Rights Campaign Foundation** Corporate Equality Index 2022, which selects the companies with the best practices in LGBT+ inclusion. It obtained the top score (100 points out of 100) for supporting and empowering this community and promoting inclusive working environments for everyone.

5.1.1.3.4. Socio-ethnic inclusion

In the field of socio-ethnic inclusion, the Inditex Group's efforts are led by our **Salta** programme, focusing on the occupational inclusion of vulnerable groups. *Salta* is aimed at generating employment opportunities in our stores, logistics centres and factories for persons or groups in special circumstances that make their employability more complex. In *Salta* we work with various NGOs that support us in the process of selection, training and follow-up of the participants.

Launched in 2008 in France, *Salta* has evolved its format for the training and integration of people in vulnerable circumstances in our teams. In 2022, *Salta* has reached India, Romania and Kazakhstan, with editions of the programme in New Delhi, Bucharest and Almaty, respectively. Of the countries already participating, the programme has reached Bari (in the Puglia region of Italy) and the Spanish islands of Lanzarote and Mallorca for the first time.

With the deployment of *Salta* in India, Romania and Kazakhstan during this year, the programme is now present in 16 markets (France, Spain, Italy, Portugal, Poland, Brazil, the United States, the United Kingdom, Germany, Mexico, Greece, South Korea, Türkiye, Romania, India and Kazakhstan). Thanks to this programme, since 2008, more than 1,600 people have joined our store teams, logistics platforms and factories. Women victims of gender-based violence and refugees are two of the most supported groups.

Notably, members of the Inditex workforce actively participate in *Salta*, acting as mentors for people joining us, and devoting their time to training and accompanying them. Since 2008, more than 3,600 colleagues have taken part in this project as trainers or tutors. Accordingly, this social commitment initiative has gained traction as an important means to strengthen the links and engagement with the people who are part of the Group.

In recognition of its work, in 2022 *Salta* was awarded the Trophée GEEIS SDG for the second time, for its contribution to gender equality through employment opportunities, consistent with the United Nations Sustainable Development Goals. The programme also received a special mention from the jury "for continuing to move forward with this project in consolidated markets (France celebrated its 30th edition in 2022) and in new markets, with a social and sustainable approach to inclusion".

Against any kind of racism and discrimination

As a group comprising people of 182 nationalities, **diversity, equality and respect for human rights** are an essential component of Inditex. Our determination to promote these values is not just a simple statement. Rather, our Diversity and Inclusion Policy specifically enshrines our zero-tolerance as a company to any kind of discrimination.

We believe in providing safe spaces, free of any expression of racism or discrimination, for our employees and customers alike. We also advocate always listening to the opinions of both these groups and implementing educational programmes so as to create, year by year, a **more diverse and equal company**.

Through awareness and training plans on diversity, fairness and inclusion, we offer country-specific training programmes, opening people's minds to the impact of unconscious bias in managing people and underscoring the need to combat all forms of discrimination and racism.

① More information in section [5.1.2. Talent management](#) of this Report.

Internationally, since 2018, Inditex has been among the companies that collaborate with ENAR, a European organisation based in Brussels that fights all forms of racism and discrimination. It is worth noting that, within the framework of this collaboration, in 2022 Inditex hosted the 14th edition of the **Equal@Work Platform** meeting at its Brussels headquarters, with the attendance of companies, social agents, NGOs, public authorities and academics committed to diversity and inclusion, to debate the role of companies in the commitment to build bridges that overcome racism in society and in the labour market. Furthermore, Inditex's community of Diversity Champions in Europe, in recognition of their collaborative work to free workplaces of discrimination and racism, in 2021 was awarded the **Holistic Diversity Management certificate** by the **ENAR Foundation**, a first for a European company.

In a similar way, in the United States, we have been collaborating with the Open to All campaign since 2019. In 2022, we broadened our commitment to this initiative by signing, alongside other international retailers, the **Mitigate Racial Bias in Retail Charter**. This charter advocates implementing solutions to eliminate racial bias in shopping experiences, jointly developing diversity and inclusion training materials, and sharing best practices among retailers to have a collective impact on our sector.

Also in the United States, in 2022 we once again provided financial support to the NAACP Legal Defense & Educational Fund, an organisation that actively fights racism, discrimination and injustice, particularly within African-American communities.

In connection with raising awareness against discrimination and racism, in 2022 the American subsidiary invited local artist Kamille Ejerta to create a mural at the corporate office in New York reflecting our commitment to diversity, inclusion and respect. The mural is called Our Community. Our Future and has been replicated on a smaller scale in all our US stores.

Finally, it is worth mentioning that in most markets, and particularly in Europe, privacy and data protection regulations do not allow companies to collect information based on ethnic or racial criteria. Nevertheless, there are markets such as the United States and South Africa, where the legislation on equality and non-discrimination focuses on knowing the **ethnic and racial diversity** of people with the aim of ensuring equal opportunities and rights.

United States	2022
Ethnic or racial group ¹	%
Hispanic or Latino	48.2%
Black or African American	20.8%
White	14.1%
Asian	8.7%
Two or More Races	5.0%
American Indian/Alaska Native	0.4%
Native Hawaiian/Pacific Islander	0.1%
Not Specified	2.7%
Total	100.0%

South Africa	2022
Ethnic or racial group ¹	%
Black South Africans	87.9%
Coloured South Africans	7.2%
Indian / Asian South Africans	1.7%
White South Africans	1.1%
Foreign Nationals	2.1%
Total	100.0%

1. The official nomenclature of the racial and ethnic groups recognised in these countries has been maintained in their original language.

5.1.1.4. Work-life balance

At Inditex we want to guarantee the well-being of our workforce. Consequently, the Company promotes measures that seek to facilitate work-life balance, advocating especially for **co-responsibility**. We consider the latter to be both a right and a duty, as we aim to reflect in our equality plans. Furthermore, our equality plans contain other balance measures such as the possibility of splitting up leave periods for hospital stays or care of relatives up to second degree of kinship, flexible working hours for adaptation periods at nursery or infant schools, or the extension of leave with job guarantee for personal matters, studies, international adoption or care of dependent family members.

In this context, in Spain in 2022 diagnostic analyses were presented to properly monitor both data and the implementation of measures under the equality plans. In the logistics companies where it is in force, negotiations have commenced to renew the equality plans: this is the case of Plataforma Cabanillas and Pull&Bear Logística where the negotiation of the second equality plan has been completed.

In addition, in the first half of 2023, the Group's Equality Plan is expected to be signed. This plan encompasses all the store concepts, their design companies and central services, as well as Inditex, S.A. and includes a series of social improvements for store staff in Spain, such as birth and/or adoption benefits, nursery and university expenses, school supplies, and benefits for disabled dependents, among other measures.

Internationally, at Inditex Group we strive to improve the rights guaranteed by the local legislation of each country through work-life balance policies, prioritising those markets in which the legislation is not especially protective.

/ In the United States, for example, in 2019 we implemented a paid parental leave policy for all our people who meet minimum requirements, so that they can devote time to the care of a new-born or newly adopted or fostered child. The subsidiary also provides care services for adults and children in care centres and at home, through an external company that is available to all staff. It also covers educational programmes, tutoring and exam preparation at subsidised rates.

/ We promote measures to broaden the rights enshrined in local legislations or that help improve work-life balance by means of flexible working hours, efficient organisation of teams, extending leave for caring for children and/or dependants and even financial assistance to help cover the cost of childcare or other care. Markets where such measures are applied include the United Kingdom, Italy, Germany, France and Argentina, among others. In addition, office staff in many of our subsidiaries have flexible entry and exit times.

/ An increasing number of markets are opting to improve conditions for their staff by extending health coverage, either as a social benefit paid for by the subsidiary itself or by negotiating more favourable health insurance conditions. In addition to Spain, through its flexible remuneration plan, markets such as Canada, Mexico, Greece, Romania and Mainland China already offer this type of benefit.

As in previous years, in 2022 100% of our employees in Spain (46,154 people, 33,749 women and 12,404 men) were entitled to parental leave in connection with birth or placement for adoption or foster care. 2,107 people took leave for birth, adoption or foster care placement (1,527 women and 580 men), almost all of whom returned to work: 2,072 people (1,505 women and 567 men). In addition, 14% of the employees in Spain enjoy a reduction in working hours for childcare (17% of employees in 2021, 18% in 2020, 16% in 2019 and 16% in 2018).

Below is a breakdown of maternity and paternity leave in Spain and the rest of the world:

Parental leave - Spain	2022	2021	2020	2019	2018
Total figures for parental leave	2,107	2,164	2,204	2,353	2,166

Total figures for parental leave	8,039
Women	7,623
Men	416
Return to work rate	92%
Women	92%
Men	98%

5.1.1.4.1. Work disconnection policies

The Inditex Group is also committed to promoting an internal policy that guarantees the **right to digital disconnection in the workplace**, pursuant to Spain's Data Protection Act (Organic Law 3/2018, of 5 December, on the Protection of Personal Data and Guarantee of Digital Rights). Thus, staff are encouraged to adopt habits such as resting between working days and during holidays and promoting direct interaction with their colleagues.

Notwithstanding the commitment acquired at the corporate level, negotiations with workers' representatives have also resulted in other measures on this front, included in the latest equality plans of the various brands, which will be transferred to the Group's new Equality Plan, applicable in Spain.

Internationally, France, a pioneer in this area, has included the right to disconnect as a measure to improve work-life balance in the company agreement on quality of life at work (Article 6), after encouraging it for years. Thus, all our people are advised to limit messages and phone calls outside working hours and they are reminded that they are not obliged to such communications outside those hours. Furthermore, department heads and store managers are aware of this system and the company undertakes to remind them of this right periodically.

Conversely, in markets where there is no legislation entitling employees to digital disconnection, such as the United Kingdom, the Group's brands have rolled out an initiative aimed at preventing employees from receiving communications from the Company on their days off and eliminating instant messaging applications as a work tool.

In Nordic countries supervisors and store managers have been issued with guidelines for leaving their work equipment in stores, so that they cannot make use of it during their time off.

In general, both the IT and human resources teams at our subsidiaries are working to promote and implement healthy work habits, regardless of whether there is legislation in place, either through information, training and awareness, or by adopting specific measures applied to our corporate systems, such as e-mail.

5.1.2. Talent management

GRI 3-3; 404-1; 404-2; AF5

At Inditex, we constantly strive to place **the best talent at the service of our customers and to ensure our growth as a company**. Our aim is to **build teams of creative and passionate people** capable of creating responsible fashion. To achieve this, from the talent management standpoint we focus on:

- / **Attracting top talent**, those best suited to achieve our objectives.
- / Providing our people with **opportunities for professional development** and growth through internal promotion and mobility.
- / Providing our staff with **continuous learning** through training, awareness and communication.
- / Creating a safe, enriching and motivating working environment with attractive conditions that enable us **to retain talented professionals, develop all their potential and strengthen their commitment**.

5.1.2.1. Talent attraction

Communicating our value proposition as an employer across the Group's brands and work areas and communicating with our candidates is key to attracting the best talent. More than two million people follow our employer brand, **Inditex Careers**, on social media, and more than 35 million have viewed our online recruitment drives.

Furthermore, Inditex Careers has cemented its position as our main source of selection, with more than 8.8 million visits from more than 200 markets in 2022. In January 2020, this portal was awarded WCAG Web Accessibility International Certification, with conformance level AA.

In 2022 we continued to pursue our commitment to a digital, engaging, flexible and sustainable recruitment process. The candidate experience is at the heart of everything we do and, in this regard, this year we have developed several differentiating actions to attract **talent** for our **stores**: we created our first digital employee, Kaia, for the Zara store opening in Battersea (London); we designed an exclusive digital recruitment experience to select the team for the largest Zara store in the world, which opened its doors in April 2022 in Plaza de España (Madrid); and we involved the stores in the selection process through actions such as the National Hiring Days, which we held in 10 markets in 2022.

Our relationships with the top universities and schools remain vital to reach talent in all creative, management and technological areas.

In our programme targeting **creative talent** we seek people for our product teams, with expertise in design, trends, graphic design, styling, art direction, photography and editing. We have combined a digital approach through different channels such as social media and the universities themselves, with in-person sessions and attendance at the top fashion shows.

Zara Business Graduates is our junior talent programme aimed at final year students, through which we seek management profiles to join our teams in different positions, such as buyers, controllers, product managers, marketing, finance and sustainability. After an online campaign and a digital event, participants introduce themselves through a video and take on an analytical challenge, with the pre-selected candidates participating in an assessment day and the final candidates coming to visit our headquarters.

In **technology**, we work with universities to remain in proximity to junior talent at every stage of their career:

- / Through the **Zara Boost** programme, we connect with students who are reaching the end of their studies and wish to access the labour market, using in-person workshops and online challenges, and contributing to the development and training of students through their studies by means of mentoring programmes. In 2022, we launched our **Tech Summer Camp**, to discover and foster talent in STEM subjects from the second year of studies onwards through a programme of summer scholarships. And, at the same time, we continued to conduct the **Stay in Contact** webinars, led by our technology team, in which we discuss our technical challenges and how we integrate technology into our business.

- / Furthermore, we have just started a collaboration with **Stanford University's ICME** (Institute for Computational & Mathematical Engineering), enabling us to be in contact with one of the world's foremost spaces for technological talent.

In recognition of our endeavours as an employer brand, **for the 12th consecutive year Merco Talento** ranked Inditex at the top of its survey analysing the 100 best companies to work for. Also in Spain, for the 8th year running, Universum has included Inditex among the best companies in which to develop professionally. In this latest edition, university students chose Inditex in various categories: Business and Commerce; Humanities, Art and Education; and Law. Zara also featured for the second time in **Universum's World's Most Attractive Employers** ranking in the Business category; this index analyses the companies that students consider to be the most appealing in terms of attracting talent in the 10 foremost international markets.

5.1.2.2. Developing talent

Developing talent is part of our DNA. At Inditex we are committed to providing **opportunities for development, internal promotion and mobility** to enable our people to grow and at the same time help us to continue evolving as a company.

In 2022 **59% of the Group's vacancies were filled internally** (50% in 2021 and 46% in 2020), which means that **more than 11,000 people were promoted** over the course of the year (around 7,500 in 2021 and 2,000 in 2020). By gender, 75% of the promotions were for women and 25% for men, figures that are consistent with the gender distribution of our workforce. This commitment to generating opportunities for internal development results, in our office teams, in more than 490 promotions and more than 740 changes of functions, department, retail concept or market.

Our marketplace of internal opportunities, **InTalent**, plays a pivotal role in fostering the internal promotion of our personnel. InTalent gives an overview of the opportunities for development in the Company, while at the same time helping our talent teams to identify people interested in growing professionally. In 2022, more than 6,000 career growth opportunities were posted, and we renewed this platform with two clear goals: the Group's commitment to the transparency and democratisation of internal growth opportunities; and the unification and globalisation of the platform. Through InTalent, all our people from any market, area or brand can view all the global opportunities available to them grouped together in one place, and can apply for those they wish, including: vacancies, temporary support in other areas or markets, and LEAP&Co development opportunities.

Furthermore, our talent identification and development application for our store teams, **LEAP&Co**, on the one hand provides transparency to access training opportunities that can lead to internal promotion, and on the other affords managers and area support teams the autonomy to manage the development plans of the people in their area, organise their network of specialist trainers by area and monitor new recruits and trainees online and in real time, adapting to the pace of the store at all times. This platform operates at Zara stores in 42 markets across Europe, America and Asia, and at Zara Home in 12 markets. More than 59,000 employees are currently registered in the application, where this year nearly than 970,000 training hours were held.

Similarly, throughout 2022 we have made significant progress in rolling out initiatives whereby our store managers have periodic and individual conversations with each member of their team on their development. Known as **Talks** in several of our brands, these conversations are a vehicle for exchanging feedback, encouraging both parties to express their opinions, ideas and concerns regarding professional development in a constructive way. At present, Bershka, Pull&Bear, Stradivarius, Massimo Dutti and Zara Home have implemented development conversations in many of their markets.

5.1.2.3. Training

Training is another fundamental driver of professional growth among our staff.

Our model is based on internal training and is mostly practical, which determines that teams' training is fundamentally on-the-job. Furthermore, we have a network of in-house trainers who guide new recruits in all aspects to guarantee their successful on-boarding.

After launching our training platform globally at the end of 2021, 2022 was the year in which TraIn positioned itself as the place where all the Group's training actions take place, including those that are carried out digitally and to support the registration of those that take place in person. Not only has this served to accompany our people in their development through training itineraries tailored to their jobs, onboarding plans, etc., but it has also been a space in which to discover training not strictly related to the specific job in hand. This helps our teams to continue learning and expanding their horizons. Fashion, Sustainability, Customer Experience, Skills, Creativity, or Digital are some of the subjects most demanded by our people when it comes to training, and all of them have a place in TraIn. Furthermore, we have continued to collaborate with top-notch educational institutions in the creation of content, such as IE Business School, the University of Leeds and Condé Nast College, among others.

From 1 February 2022 to 31 January 2023, more than 2.6 million training hours were imparted to more than 1.3 million participants (more than 2.3 million hours and more than 551,000 participants in 2021; more than 1 million hours and more than 370,000 participants in 2020; more than 3 million hours and 360,000 participants in 2019; and more than 2.7 million hours and 146,000 participants in 2018).

Details of the training indicators are as follows:

Distribution by job classification¹:

Job classification				
2022				
	Training Hours	Participants	Average staff	Hours per person

Main training initiatives in 2022

Corporate training on our culture and values

/ **Compliance:** at Inditex we share a solid commitment to a corporate ethical and compliance culture, grounded on principles of integrity, honesty, transparency and responsibility. Compliance encompasses strict adherence to the external and internal applicable regulations, and how each employee applies them to our daily activities. Consequently, we continue to promote training in this area and in 2022 we launched a global compliance course, mandatory for certain of the Group's employees, via our learning platform TraIn.

① More information in section
[6.1.3. Compliance and criminal risk prevention system](#)
 of this Report.

/ **Diversity and Inclusion.** Training our teams in diversity and inclusion is essential to create an inclusive culture and make spaces free of any kind of discrimination. In 2022, more than 41,000 people worldwide accessed training through one or more of the courses provided in connection with diversity and inclusion, which involved almost 20,000 training hours in this field. In 2022, our training included various in-person, e-learning and online courses, notably including "Diversity, Inclusion and Belonging", "The Right Leader @ Inditex is inclusive", "Unconscious Bias" and "D&I Matching HR", among others.

In 2022, we developed a long-term, global training plan with the aim of raising awareness among our entire workforce. Since 2023, this training is conducted through the **D&I Channel** within our corporate e-learning tool **TraIn**, and it is structured in various levels: from basic level for all employees, available for the vast majority of markets this year, to more advanced levels focused on raising awareness among different positions and functions within the Company. This channel's pilot was launched in December 2022 and has been tested internally by more than 1,500 Changemakers and D&I Champions.

Language training: Busuu is an app for mobile devices that offers employees the opportunity to learn up to 14 languages, having added Korean this year. We offer everyone access to its premium version, which includes the option to obtain official certificates (more than 2,000 this year), with English and Spanish the most widely studied languages. Overall, in 2022 our staff devoted more than 23,000 hours to improving their language skills using Busuu.

In-store training

/ **Zara Campus** is a project designed to respond to the need for training and development among new promotions and people in management positions in stores. This training is conducted in our Campus stores, which are Zara stores used as a practical scenario for training our managers in three areas (management, sales and operations). We also provide training aimed at the development of certain groups, such as the Zara Masters (tutors for the on-boarding training of our new recruits) and leadership training for managers.

/ **Customer experience:** To share our new Zara customer-centric commercial approach, we have designed a project that supports our best ambassadors: our store people. The aim is to hone their skills to increase the satisfaction of customers visiting our stores. Store managers are leading this change, backed by improved tools for understanding customer perceptions. Customer Experience has been implemented at 273 ZARA stores in 33 markets.

/ **Stradivarius itineraries:** TraIn has made it possible to digitalise, facilitate access and clearly organise our team training, creating training itineraries for the various functions in stores. The creation of the content map, following the Leap&Co system, allows us to connect the processes and not lose sight of the necessary multi-functionality in our teams. The itineraries are currently implemented in Spain, Italy, Türkiye, Greece, Portugal, UK and Ireland, and the intention is to implement them in 100% of markets with own stores by 2023. More than 5,000 people participated in this training paths, and a total of over 207,000 training hours were completed.

/ ZARA Camp is a digital training program about Zara and its business model, where the employees themselves provide information about the area/department in which they work and their main functions and responsibilities. The project consists of 30 modules made up of videos, manuals, glossaries and tests.

This training is available to all Zara employees worldwide and the programme is customised according to each person's area of activity (office, store or logistics).

#BoostYourPower

As part of our commitment to a holistic and systemic approach, we see sustainability as being organically integrated into all areas of our Company.

This is how we came up with **#BoostYourPower**, an initiative to train and inspire our teams, generating new spaces for change. Since 2021 we have focused on two key areas due to their impact: buying teams, with their purchasing offices, due to their involvement in the creation of our products; and our store staff, as our direct contact with customers. Two initiatives emerged from this vision: **The Sustainable Fashion School and Changemakers**.

The Sustainable Fashion School consists of a space for knowledge and inspiration where our buying and design teams are backed by a very solid foundation of technical knowledge and access to the latest innovations in sustainability. In 2022, within the framework of this project, we provided more than 57,000 training hours for product teams across all the Group's brands.

Firstly, in January 2022 we launched our first Foundations of Textile Manufacturing Master's programme. As a result of our partnership with the University of Leeds, this master's programme was devised to cover all the technical knowledge relating to a garment's life cycle, with the aim of continuing to foster improvements in the sustainability of our processes. More than 950 people from Zara's design, buying, fabrics and quality control teams take part in this first edition, in which 8 modules have been taught and the first stage with certification completed ("From Fibres to Yarn "). A total of 460 people have now received their first SFS certificate.

And in May 2022 the second edition was launched, this time targeting all product teams from the rest of the Group's brands. More than 780 people are also taking part in the training itinerary previously commenced by their colleagues from Zara, with a total of more than 1,700 people having enrolled in the programme. A total of 220 employees from the remaining concepts have now completed the first stage of the programme.

In addition, during the year 2023 we will complete the entire training programme and commence editions for new recruits.

Furthermore, **Changemakers** is the community leading this cultural transformation from the heart of our business, our stores. In order to provide the necessary space for reflection and change, we prioritise inspiration and training for our teams. Planet, People and Community are the three pillars on which knowledge about Sustainability and Diversity & Inclusion rests.

These agents of change join the project on a voluntary basis, leading the dialogue with other Company areas from their stores. Their aim is to pass on what they have learned to their teams and at the same time take on board the feedback, suggestions and concerns of their colleagues and our customers. These proposals are then translated into projects that have a real impact.

At the end of 2022, this project has been implemented at all the stores in all 51 markets in which Zara is present. In addition, we have triggered its roll-out in 5 markets and 56 stores of the rest of the Group's brands. As a result, Inditex currently has more than 1,800 Changemakers. In 2023 we will expand the Changemaker community to all the Group brands' remaining stores and markets.

5.1.2.4. Connection and engagement with our people

The fourth objective of our talent management strategy is to provide safe, enriching and motivating work environments that help us retain talent, connect with our people and boost their commitment to the Group. As for connecting with our teams, our internal communication channel **INET** plays a vital role.

Present in app and online format in all the markets where we have employees, INET enables us to digitalise both communication with our people and many of the tasks that our employees carry out daily. In addition, as is the case with our commercial apps, we are continuously adding new features to this platform to keep us permanently connected. In 2022, INET recorded more than 25 million accesses (more than 21 million in 2021 and more than 19 million in 2020).

Furthermore, in 2021 we started to launch various **specific communication channels** for some of our brands. Every morning, they provide us with the opportunity to bring omnichannel to the 'good morning meetings' in all our markets, sharing with our people information about products, processes, people, news, trends and inspiration. These channels also enable us to receive first-hand feedback, suggestions and comments from our teams, establishing a direct connection between our store and structural teams. Specifically, Zara uses Dear Team, Zara Home has #tengoalgoquecontarte, Massimo Dutti uses Journal, and in 2022 we have launched STRADIPEOPLE for Stradivarius.

In addition, in 2022 we have also made progress in deploying **InStories**, our internal social media platform, which has been rolled out in Australia, New Zealand, Chile, Argentina, Uruguay, the United States, Ireland, India, Romania and Bulgaria. Consequently, InStories is now available in 23 markets (including Italy, Portugal, Greece, Türkiye, Poland, South Korea, Japan, Mexico, Russia, Belarus, Brazil, the United Kingdom and the Netherlands). As of the end of 2022, the InStories community has shared more than 350,000 contents since its creation.

Finally, in order to keep tabs on our stores and ascertain our people's perception of what it is like to work with us, we developed "**Your opinion matters to us**", a completely anonymous survey that we send to store employees when they leave Inditex. Launched in 2016 and available in all our markets with own stores, it allows us to obtain their feedback on various aspects of their day-to-day life, such as the relationship with their colleagues or managers, the training they receive, their salary or how well their working hours suits their availability. In addition, the question "Would you recommend Inditex as a place to work?" is used to measure levels of engagement. In 2022, this question obtained an average of 70% positive responses, obtaining 91% positive responses in Spain.

5.1.3. Employment

GRI 2-4; 2-7; 3-3; 405-1; AF22

The creation of **stimulating, stable and safe working environments**, in which equal opportunities and professional development are a reality, is a priority for Inditex.

As a Group with employees in 60 labour markets and very diverse realities, we work to adapt our responses to local needs so that all our people, wherever they are, can enjoy working in the highest quality environments possible.

With regard to 2022, the first quarter was shaped by the halt in all our commercial activity in Russia and Ukraine. Throughout the year, the Group's priority and efforts have focused on providing the necessary support to the workforces in both countries. For the people employed in Ukraine, two actions were

taken: firstly, in the financial sphere, we maintained full payment of salaries; and secondly, we adopted the necessary measures to support staff in any way necessary, from help with visa procedures and travel arrangements to psychological support, among other measures. With regard to the situation of our staff in Russia, their salaries have continued to be paid in accordance with local legislation.

5.1.3.1. Distribution of the workforce by contract type

In 2022, 82% of our people were on a permanent contract (compared with 81% in 2021, 87% in 2020, 77% in 2019 and 73% in 2018).

The tables below show the different types of contract by gender, age and job classification:

Employee distribution by contract type, gender, age and job classification¹

	2022				2021				2020				2019			
	Permanent		Temporary		Permanent		Temporary		Permanent		Temporary		Permanent		Temporary	
	Number of employees	%	Number of employees	%	Number of employees	%	Number of employees	%	Number of employees	%	Number of employees	%	Number of employees	%	Number of employees	%

Total	134,843	82%	30,153	18%	133,829	81%	31,213	19%	125,438	87%	18,678	13%	135,187	77%	41,424	23%

1. Data on type of contract and hours available in 2022 for 100% of the workforce (98.2% in 2021, 95.4% in 2020 and 94.7% in 2019). To calculate the number of contracts by type of contract, broken down by gender, age and professional classification, the corresponding percentages are applied to the total workforce.

2. The description of the functions of the three job classification groups is:

- Management: employees in managerial positions with responsibility for interdisciplinary working groups related to the areas of design, manufacturing, distribution, logistics, stores, technology, sustainability and other general services. This category includes store managers.
- Supervisor: employees who are part of interdepartmental and transversal working groups for design, logistics and stores, as well as sustainability, technology and other general services.
- Specialist: employees with an impact through individual contribution related to one of the Group's activities in the areas of design, manufacturing, distribution, logistics, stores, sustainability, technology and other general services.

5.1.3.2. Distribution of the workforce by type of working hours

In terms of working hours, in 2022, 59% of Inditex's workforce was part-time and 41% full-time (56% part-time and 44% full-time in 2021, 50% part-time and 50% full-time in 2020; 53% part-time and 47% full-time in 2019; and 49% part-time and 51% full-time in 2018).

This ratio of part-time to full-time workers is typical of the retail sector, where part-time reinforcement teams are typically required at certain times of the season: for example, our stores and logistics centres are typically reinforced during the busiest times, such as the sales season or Black Friday. In addition, we often employ people who combine this activity with other activities, mainly their studies.

A meaningful indicator when it comes to explaining the quality of employment is the **FTE** (Full-Time Equivalent), which in 2022 tells us that the workforce resulting from all full-time hours represented 77%⁵ of total jobs (78% in 2021⁶, 79% in 2020 and 79% in 2019).

Below is a breakdown of part-time employees by gender, age and job classification:

Distribution of part-time employees by gender, age and job classification¹

	2022				2021				2020				2019			
	Part-time Number of employees	%	Full-time Number of employees	%	Part-time Number of employees	%	Full-time Number of employees	%	Part-time Number of employees	%	Full-time Number of employees	%	Part-time Number of employees	%	Full-time Number of employees	%

1. Data on type of contract and hours available in 2022 for 100% of the workforce (98.2% in 2021, 95.4% in 2020 and 94.7% in 2019). To calculate the number of contracts by type of working day, broken down by gender, age and professional classification, the corresponding percentages are applied to the total workforce.

2. The description of the functions of the three job classification groups is:

- Management: employees in managerial positions with responsibility for interdisciplinary working groups related to the areas of design, manufacturing, distribution, logistics, stores, technology, sustainability and other general services. This category includes store managers.
- Supervisor: employees who are part of interdepartmental and transversal working groups for design, logistics and stores, as well as sustainability, technology and other general services.
- Specialist: employees with an impact through individual contribution related to one of the Group's activities in the areas of design, manufacturing, distribution, logistics, stores, sustainability, technology and other general services.

5.1.3.3. Leavers

The workforce in Spain at the end of 2022 totalled 46,154 people, of whom 73% were women and 27% were men.

In 2022, there were 710 dismissals in Spain for various reasons (741 in 2021, 968 in 2020, 978 in 2019 and 954 in 2018). Breaking down these data by gender, the distribution is similar to that of the workforce, as the number of women dismissed was 504, i.e.

71%, compared to 206 men, i.e. 29% (537 women, compared to 204 men in 2021; 770 women, compared to 198 men in 2020; 746 women, compared to 232 men in 2019; and 721 women, compared to 233 men in 2018).

⁵ FTE employment data available in 2022 for 99% of the workforce (91% of the workforce and not available for Belgium, US and Türkiye in 2021).

⁶ The FTE employment data reported in the Statement of Non-Financial Information 2021 have been corrected. The correct figures are 78% for 2021, 79% for 2020 and, 79% for 2019.

With regard to dismissals by job classification and age in Spain, 80% were concentrated in specialist positions, according to the classification previously provided (76%, 71%, 71% and 75% in 2021, 2020, 2019 and 2018, respectively), for store and corporate headquarters, own factories and logistics centres alike. 11% of the dismissals were in supervisor positions, and the remaining 9% in management positions. Regarding dismissals by age in Spain, 44% (43%, 51%, 56% and 52% in 2021, 2020, 2019 and 2018, respectively) affected staff aged 30 to 40 years, the age group which accounts for the 34% of staff in Spain. This proportion is consistent with the distribution of the workforce in our country, where the Company's corporate services are based. 31% of the dismissals were in the over 40 age bracket (representing 35% of our workforce), and the remaining 24% in the under 30 age bracket (representing 31% of our workforce in Spain).

In terms of worldwide dismissals, with a headcount of 164,997 people in 2022 (165,042 people in 2021, 144,116 people in 2020, 176,611 people in 2019 and 174,386 people in 2018), there were 5,694 dismissals in the year 2022 (4,892, 5,870, 6,428 and 8,661 dismissals in 2021, 2020, 2019 and 2018, respectively). Of the total number of dismissals, the number of women who terminated their relationship with the Group for this reason was 3,976, 70%, compared to 1,718 men, 30% (3,441 women and 1,451 men in 2021; 4,332 women and 1,538 men in 2020; 4,344 women and 2,084 men in 2019; and 6,134 women and 2,527 men in 2018), again consistent with the gender distribution of the overall workforce. As for dismissals by job classification, 88% were concentrated in specialist positions (83%, 81%, 87% and 89% in 2021, 2020, 2019 and 2018, respectively), 7% in supervisor positions, and the remaining 5% in management positions, which is also consistent with our workforce distribution. By age, 68% of the dismissals corresponded to people under 30 years of age (60%, 61%, 68% and 75% in 2021, 2020, 2019 and 2018, respectively), the age bracket which accounts for 57% of the Group's employees (58%, 54%, 61% and 62% in 2021, 2020, 2019 and 2018, respectively). 24% of the dismissals were in the 30-40 year age group (which accounts for 27% of our workforce), and the remaining 8% in the over 40 age group (which accounts for 16% of our people).

5.1.4. Labour Relations

GRI 2-30; 3-3; AF7; AF26; AF29

At Inditex, we are strongly committed to **respecting our employees' labour rights** worldwide and, in particular, their **right to participation**, as a key element for the sustainable development of the business model.

This commitment is enshrined in Inditex's Code of Conduct and Responsible Practices, applicable to all Group employees, and which addresses **respect for trade union relations and rights** in Chapter 3 on General Principles. The Code states that "Inditex employees have the recognised right to associate or organise themselves or to bargain collectively". Additionally, pursuant to section 4.2 of the Code: "Inditex makes its own, as part of its internal regulations, the contents of any national and international agreements and conventions to which it has adhered, and undertakes to promote and enforce them".

In this regard, in 2009 we signed a Global Agreement for implementation of fundamental labour rights and decent work, with UNI Global Union (UNI). UNI is a network of trade unions in the trade and retail sector, which encompasses more than 900 trade unions worldwide and represents more than 20 million workers. 100% of the Inditex Group employees are covered by the Global Agreement signed with UNI.

This Agreement between UNI and Inditex includes specific provisions regarding a number of issues governed pursuant to the principles established by the International Labour Organization (ILO):

/ Among other rights, special mention is made therein to the enforcement of ILO Conventions 87 and 98 on ensuring **freedom of association and the right to collective bargaining**. In this regard, the Agreement states that 'Inditex recognises the right of trade unions to represent the workers and to regulate through collective bargaining the terms and conditions of their employment'.

/ **The freedom to join any trade unions and non-discrimination** on account of membership to a trade union as part of labour relations is also ensured. Additionally, pursuant to ILO Conventions 100 and 111 and based upon non-discrimination on employment, equal opportunities and equal treatment for all people and non-discrimination in terms of remuneration for equal jobs are upheld. Inditex is committed to complying with applicable national laws and/or conventions, in furtherance of ILO Conventions 1 and 47 and of ILO Recommendation 116 concerning the working week and hours of work.

As for the objective scope of application of the Agreement with UNI, in addition to the reference to the protection and promotion of fundamental rights, the Group is committed to meeting the requirements laid down in national laws and in national collective bargaining agreements regarding working hours, protection of a safe, healthy and sustainable working environment, and promotion of best practices for occupational health and safety with the appropriate equipment and training. The Agreement between Inditex and UNI covers minimum rights for the staff of the various companies within the Group, given that in any event, such provisions, whether statutory, contractual or included in a collective bargaining agreement which confers higher rights, will always be respected.

Further to the above referred Agreement between Inditex and UNI, United Food and Commercial Workers International Union ("UFCW"), a US trade union and member of UNI, was interested in reaching a specific agreement with the Company for the stores in the USA covering the terms of the above referred 2009 Agreement. In response to this demand, an agreement was signed in 2015 with UNI, UFCW, Inditex and Zara USA, which led to the approval of a collective agreement that currently extends to 25 stores in the states of New York, New Jersey, Connecticut and Massachusetts (24 stores in 2021 and 21 stores in 2020).

Likewise, in 2019, the Inditex Group formally established the Company's European Works Council (EWC), devised as a body for assurance and effectiveness of information and consultation of employees on transnational issues. The EWC played a crucial role on two particularly sensitive occasions; on the one hand, as a natural liaison for the Company in all matters related to the situation arising from the global health emergency, and on the other, through its role as guarantor of the Group's digital transformation process which, in the case of Spain, was enshrined in the Digital Transformation Plan Agreement, on the working conditions of the staff of the absorbed stores. This agreement was signed by Inditex's retail concepts in Spain and the Federation of Services of the trade union *Comisiones Obreras* and the Federation of Services, Mobility and Consumer Affairs of the trade union UGT, and was in force until 31 January 2023.

The EWC met twice in 2022. The first, extraordinary plenary meeting was held on 16 March, following the Russian invasion of Ukraine and at the request of the EWC to ascertain first-hand how this situation was affecting the workforces in both countries and what impact it would have on Inditex as a whole. Subsequently, in September, the ordinary plenary meeting took place in Arteixo, with the participation of the eight member countries, whose representatives were once again able to meet the Company in person. Over the course of the three-day meeting, both members and alternates received training in the content of the new proposed European Directive on companies' due diligence, they resumed the working group on gender equality and they were informed by Inditex of the financial results, as well as regarding other matters on the agenda.

The progress reflects the health of social dialogue at the local level at Inditex subsidiaries, with training provided to human resources teams and store managers concerning trade union rights and cooperation with our workforce's legal representatives. The works councils and management of our subsidiaries meet periodically to inform, consult and listen to the union representatives and reach agreements to improve people's working conditions and quality of life. Markets such as France, Italy, Germany, Austria, Belgium, Luxembourg, Norway, Sweden, Finland, Denmark, Chile and Argentina represent tradition in labour relations, while other countries like Poland are exploring new ways to manage their workforce on a day-to-day basis, with a new means of employee representation. Even in markets where there is no trade union culture, there are formulae that aim to achieve the same goal, namely people's engagement in their working environment. Such is the case in South Korea, where there is a collegiate body of three members who represent the rest of the employees in regular monitoring meetings and in the agreements reached with the Company regarding working conditions.

There are other examples of employee engagement at the Group, such as in the Netherlands or the UK and Ireland, where wellness committees have been set up in which several members of staff meet regularly to discuss health and wellness issues and ensure that appropriate strategies and measures are addressed.

Overall, the measures implemented this year in terms of social relations mean that, globally, the percentage of employees covered by local collective bargaining agreements remains at 61% (60% in 2021 and 2020, 56% in 2019 and 70% in 2018) while, in Europe, the percentage is close to 70%, as in 2018, 2019, 2020 and 2021. In Spain, 100% of the Group's workforce is covered by collective bargaining agreements.

At the end of 2022, union negotiations began in Spain between Inditex and the leading national trade unions. The negotiations culminated in the signing of the State Collective Agreement between the Inditex Group's Retail Concepts in Spain, the Federation of Services of CC.OO. and the Federation of Services, Mobility and Consumer Affairs of UGT, for the Improvement and Standardisation of the Remuneration and Social Conditions of the Group's Employees. This agreement, whose economic measures are retroactive to 1 January 2023, guarantees, among other improvements, a fixed annual income at the Company based on workers' experience and responsibility, conducive to standardising working conditions for all store staff in Spain.

Work organisation

The Inditex Group Code of Conduct and Responsible Practices assumes as part of its internal regulation the content of applicable legislation and agreements and conventions, national and international, of which the Company is a party, and commits itself to comply with them.

Regarding organisation of work, the Code specifically regulates respect for the time limits set by the applicable laws in each country in terms of weekly working hours and overtime.

This commitment to compliance with working hours is addressed in the Global Agreement with UNI, which includes a section on the guidelines provided in ILO Conventions 1 and 47 regarding eight-hour days and 40-hour weeks, respectively, and in Recommendation 116 regarding reduction of normal working hours established as a minimum standard for each country.

In practice, laws and collective bargaining agreements applicable to Inditex establish maximum annual working hours for employees, based upon which work schedules are agreed. Inditex has in place a working time control system, in accordance with the applicable legislation in each market.

5.1.5. Remuneration policy

GRI 2-19; 2-20; 2-21; 3-3; 405-2; AF7

The team at the Inditex Group are remunerated in accordance with their **professional worth, experience, dedication and responsibility**. Our remuneration policy guarantees **non-discrimination** by reason of gender, age, culture, religion, ethnicity or any other circumstance.

As a Group with a presence in 60 labour markets, our remuneration policy seeks to adapt, at all times, to the circumstances of each of them, always within the Group's culture and values and respecting the identity of each of the brands. Accordingly, we strive to ensure that the remuneration standard is adapted to the local reality of each market, establishing remuneration according to the reference practices of each of these markets in local currency.

Inditex's remuneration comprises a **fixed component and a variable component**.

Fixed remuneration is determined by experience, personal contribution to the work and responsibility within the organisation. Variable remuneration depends fully on predefined, quantifiable and measurable indicators, all linked to the Company's results. Based on this criterion, variable remuneration does not depend on a discretionary assessment of a person's individual performance, but is based solely on objective parameters. The purpose is to guarantee non-discrimination. In this regard, **variable remuneration is one of the key components of Inditex's remuneration policy and applies to employees in all areas of the Company's activity**.

In stores, our most widely used variable remuneration system is that of the monthly sales commission scheme. This is a way to reward the engagement of store employees in key issues as sales results, feedback on products and store coordination and organisation. In addition, over the last few years, we have started implementing a new system of in-store variable remuneration with a special focus on transparency and simplicity, orienting our people towards sales, guaranteeing pay equity, and taking into account the changing environment.

Similarly, true to our values of transparency and results orientation, in 2020 we aligned the Group's sustainability objectives with those of the office staff in terms of remuneration. Accordingly, **compliance with sustainability goals is a component of our office employees' variable remuneration**. This underpins our commitment to our people in this regard, highlighting the fact that our variables are fully linked to business results.

Gender pay gap

At Inditex we are committed to equal pay and, in this regard, the pay gap is the **indicator that most transparently** conveys the difference in salaries between women and men.

The gender pay gap is calculated based upon the median salary in each market (considering total salary: fixed plus variable, consisting of commission and bonus), weighted according to each area of activity of the Group (store, central services, logistics and factories). This median is in turn weighted according to each market's weighting over the aggregate number of Inditex employees. As a result, a global reliable indicator of pay gap between male and female workers in the Group is obtained.

The outcome of the analysis carried out in 2022⁷ **shows wage parity between men and women in Inditex**. In total salary, women have been paid 0.4% more than men. If we break down the gap by professional classification, in 2022 it was 1% for specialists (representing 85% of our people), -3% for supervisors (representing 9% of our people) and -8% for management positions (representing 6% of our people). The global gender pay gap has suffered a slight variation with respect to previous years (in 2021, women were paid 0.3% more than men; in 2020, men were paid 0.4% more than women; in 2019, women were paid 0.2% more than men; and in 2018, women were paid 0.8% more), which is explained by staff turnover during the period.

⁷ The gender pay gap analysis and the global average remuneration for fiscal year 2022 does not include Russia and Ukraine (markets that represent 3.9% of the workforce).

Gender pay gap	2022	2021	2020	2019	2018
Total	0.4%	0.3%	-0.4%	0.2%	0.8%

The pay gap by geographic area is detailed below⁸:

Gender pay gap	2022	2021	2020	2019	2018
Spain	-1.1%	-0.8%	-0.8%	0.5%	1.0%
Europe excluding Spain	1.1%	0.4%	-0.7%	-0.6%	0.2%
Americas	0.5%	1.7%	2.6%	3.6%	0.3%
Asia and rest of the world	1.6%	1.8%	-1.1%	-0.1%	0.0%
Total	0.4%	0.3%	-0.4%	0.2%	0.8%

Regarding this figure, it should be noted that the number of employees in Spain, our home market, only represents 28% of the total, and a significant portion, 72%, of the remaining staff are based in markets where wages translated into euros result in lower average remuneration (28% and 72% of the workforce in 2021, 2020, 2019 and 2018).

By gender, the average remuneration of women in 2022 amounted to an annual gross figure of 25,387 euros, and that of men came to 28,827 euros (women: 22,770 euros in 2021, 22,749 euros in 2020, 21,142 euros in 2019 and 19,935 euros in 2018; men: 26,502 euros in 2021, 27,657 euros in 2020, 24,897 euros in 2019 and 23,556 euros in 2018). These two figures are not representative in terms of equal pay: the pay gap between men and women is due to a higher presence of women in a significant number of markets where average remuneration is lower on account of the exchange rate effect.

At Inditex, we calculate the pay gap by market (weighted with the weight each of them represents), allowing for the isolation of the impact of the different local currencies, fluctuations in the exchange rate and the geographic distribution of the workforce.

Based on these premises, the average remuneration by age and by job classification is provided below:

Global average remuneration

Average remuneration is defined as the average wages in the Group (considering the total salary: fixed plus variable, consisting of commission and bonus), translated into euros, using the average exchange rate in 2022⁹. Based on this calculation, global average remuneration in this period at Inditex amounted to 26,294 euros gross annually (23,701, 23,959, 22,073 and 20,996 euros in 2021, 2020, 2019 and 2018, respectively).

⁸ The geographic areas included in the breakdown correspond to the areas where Inditex has significant operations.

⁹ The gender pay gap analysis and the global average remuneration for fiscal year 2022 does not include Russia and Ukraine (markets that represent 3.9% of the workforce).

Aggregate remuneration in €	2022	2021	2020	2019	2018
Job classification¹					
Management	66,446	52,744	50,050	51,327	47,804
Supervisor	39,470	33,840	32,859	31,002	27,963
Specialist	22,964	20,875	20,751	19,260	18,480
Age					
<30 years old	19,597	17,054	16,598	16,444	15,350

> 40 years old	44,044	42,130	43,648	42,297	41,062

1. The description of the functions of the three job classification groups is:

- Management: employees in managerial positions with responsibility for interdisciplinary working groups related to the areas of design, manufacturing, distribution, logistics, stores, technology, sustainability and other general services. This category includes store managers.
- Supervisor: employees who are part of interdepartmental and transversal working groups for design, logistics and stores, as well as sustainability, technology and other general services.
- Specialist: employees with an impact through individual contribution related to one of the Group's activities in the areas of design, manufacturing, distribution, logistics, stores, sustainability, technology and other general services.

5.1.6. Our people's health, safety and well-being

GRI 403-1; 403-2; 403-3; 403-4; 403-5; 403-6; 403-7; 403-8; 403-9; 403-10; 413-1; AF24; AF31

Guaranteeing and promoting our employees' health and safety is paramount for the Inditex Group. Accordingly, we implement **international best practices** in this area, complying with the most stringent standards, and we train and inform our staff on these matters, always looking for areas of improvement.

In 2022, we have updated our **Occupational Health and Safety Policy**, the latest version of which was approved by the Board of Directors in their meeting of 13 December 2022. This latest version of the Policy reinforces the positive impact of the Group's short- and medium-term initiatives for workers, customers, suppliers and other stakeholders, and enshrines Inditex's commitment to promoting safety, health and well-being in the workplace, recognising them as a cornerstone of its activities.

Thus, the Policy aims to ensure the continuous improvement of occupational health, safety and well-being, and considers this to be a common goal that extends to all levels of the Group.

5.1.6.1. Health and safety protection

Since 2014, the Inditex Group has included in its goals the implementation of **the ISO 45001:2018 management system**, which is an internationally recognised technical specification aimed at controlling risks and improving occupational health and safety performance. It is considered the highest standard in this field.

The retail and design activities in India and Switzerland were certified during 2022, bringing the total number of markets in which they are certified to 27. Furthermore, the manufacturing and logistics companies in Spain have been maintained and audited under ISO 45001 standards, and the management of this activity in the Mexico distribution centre has been certified. Furthermore, the certification of the Cajamar distribution centre in Brazil has been maintained. During 2022, the Management System has been audited in 212 workplaces.

77%¹⁰ of the Company's own employees who work in Inditex Group's activities, companies and markets—over 122,000 people—do so in areas where the highest standard in the occupational health, safety and well-being management system is implemented, in keeping with the maximum requirements of the ISO 45001 standard and in a process of continuous improvement.

With regard to the execution of refurbishment and construction works of stores and singular buildings in Europe within the Inditex Group, carried out by the company GOA INVEST, S.A., in 2022 it continues to be certified to ISO 45001 standard.

Worker health and safety training

Continuous health and safety training is a key activity both for companies, as it helps to reduce accidents, and for workers, for whom it is way to learn about their working environment, the risks to which they may be exposed and how to prevent them.

Occupational health and safety competencies and qualifications form a body of specialised knowledge. There are as many types of training programmes as there are tasks or jobs, and different objectives are set, ranging from training required for a management position to training that aims to equip workers with the knowledge they need to work safely.

¹⁰ Does not include Russia and Ukraine workforce.

5.1.6.2. Promoting well-being

Inditex, Healthy Organisation

Our commitment to **promoting and protecting our people's safety, health and well-being** was recognised again this year in the form of the **Healthy Company certification**, a distinction that identifies cross-cutting management of the health, safety and well-being of individuals based on physical and psycho-social aspects, resources allocated to the health of the workers, and the participation of the Company and its workers in the community. This certification follows the World Health Organization model and is audited every two years.

Specifically, in 2022, the Group's companies in Spain, Italy, the United Kingdom and Ireland, Japan, Portugal, Greece, Argentina, Mexico, Uruguay, Germany, Poland, Türkiye and Chile have maintained Healthy Company certification and, in addition, the markets of Mainland China, Belgium, Luxembourg, Canada, Bulgaria, Croatia and Romania have been certified. In addition, the goal for 2023 is to obtain certification for the Group's companies in Serbia.

Well-being Committees

In 2022, we also made headway in setting up new Well-Being Committees in India, Canada, Belgium, Luxembourg, Romania and Japan (making a total of 13 markets); meanwhile, in Spain, these Committees have been set up at Zara Home, Pull&Bear and Zara. These are cross-cutting bodies for the promotion and coordination of a range of initiatives and actions aimed at promoting people's well-being, in such varied aspects as diversity, equality, health, inclusion, work-life balance, mental and psycho-social health, working hours, food, ergonomics, work spaces, sports activities, employee mobility, events and social actions (participating in world days and employee engagement in the community).

Promoting health

Inditex also runs the **InHealth** portal, which focuses on promoting health and healthy habits among the Group's employees, through news, actions or challenges adapted to their working environment, to raise awareness on the importance of maintaining a balance between body, mind and emotions. This portal is currently accessible in 25 markets, following the launch over the course of 2022 in Croatia, the Netherlands, Japan and Chile. Moreover, in 2023 it is scheduled to be rolled out in Slovenia, Montenegro, South Africa, Brazil, the Czech Republic and Slovakia. InHealth now covers 72% of the Group's employees.

Health services

In keeping with our commitment to our workers' healthcare, at all our logistics and manufacturing centres there is a **medical service** available to them. These medical services offer periodic check-ups and other ancillary health control tests for workers, as well as flu vaccination drives, among other functions. In addition, all our head offices, distribution centres and factories in Spain are equipped with breastfeeding rooms.

Likewise, in the markets where we operate we are developing health services initiatives as part of the objectives of the Healthy Organisation certification, including: the psychological support line in Mainland China, South Africa and Portugal, additional health insurance in Slovakia, Greece, Türkiye, India, Romania or Canada and initiatives in other markets related to physiotherapy services, additional eye tests with subsidies for glasses purchases and more frequent medical check-ups or additional types of tests than legally established in the local legislation.

Prevention of musculoskeletal injuries

Another of our health and safety objectives is the prevention of musculoskeletal injuries. In this regard, at Inditex we **continually assess** the ergonomic conditions associated with physical strain in tasks carried out at work centres, both by our teams and by third parties who perform their activities there. Through this assessment, based on an entirely preventive approach, we identify tasks that involve manually handling loads, awkward postures and repetitive movements in order to plan preventive actions on ergonomic conditions, aimed at protecting workers' health. Based on this knowledge, we provide initial training on musculoskeletal injuries to all workers at our logistics centres and stores.

In 2022, more than 7,000 employees took part in initiatives such as 'Lighten the Load', a Back School and Pain Free Movement Workshop. The 'Let's Move' Posture Coach continued to operate, as did the Prevent and Recover Plans. They include yoga, pilates and swimming pool training at various partner centres, with specific exercises or tips on 'Caring for your Back' in the store environment.

5.1.6.3. Health and safety indicators

In 2022, we have continued to compile information on accidents in our own logistics, store, office, manufacturing and construction activities. We are implementing preventive measures in regard to the investigated and assessed risks such as overexertion, slips and falls on the same level, as well as tripping and sudden movements, which we have identified as the most representative incidents.

When analysing health and safety indicators, we consider an occupational accident to be any bodily injury to a worker during or as a consequence of the work performed as an employee, while an occupational disease is a disease whose onset is a result of the work performed as an employee in the activities and specified in the professional illnesses chart of the activity, according to local legislation. Such disease must be a result of the action of elements or substances indicated in said chart for each occupational disease.

Furthermore, in 2022 there have been no fatalities resulting from an occupational injury or accident in any of our markets.

8. Argentina, Brazil, Canada, Chile, United States, Mexico and Uruguay.

In fiscal year 2022, the total number of hours of absenteeism due to common illness, corresponding to 97.4%¹¹ of the Group's employees (including all logistics and store employees in the world and office employees in Spain), amounted to 13,067,037 hours (11,028,054 hours in 2021, corresponding to 95.4% of employees; 10,761,725 hours in 2020, corresponding to 96% of employees; 10,275,537 hours in 2019, corresponding to 92% of employees; and 9,107,205 hours in 2018, corresponding to 83% of employees).

The total number of hours worked in 2022, corresponding to 92.8% of the Group's employees (including all logistics and store employees worldwide), amounted to 177,342,180 hours (92.7% of employees and 169,194,610 hours in 2021 and 92% of employees and 132,302,227 hours in 2020).

Non-employee worker accidents^{12,13}

At Inditex we look after the health and safety not only of our people, but also of non-employee workers. In this connection, there were seven accidents involving non-employee workers in Spain, while there were no accidents in the markets of Germany, Bulgaria and Mainland China in 2022.

Emergency management

So as to **actively manage at all times the risks** that may arise in any workplace, and in keeping with our philosophy of following the precautionary principle, we have designed, prepared and implemented **Emergency and Evacuation Plans and Self-Protection Plans** that establish the organisational and functional criteria in the different facilities. The objective is to prevent, control and provide an adequate response, from the outset, to potential emergency situations that may cause harm to people and/or their property.

Through these Plans, we comply with the regulatory requirements applicable to occupational risk prevention and occupational health and safety, as well as with the internal requirements established by the Group for the workplaces.

In short, these Emergency and Evacuation Plans and Self-Protection Plans include the necessary steps for prevention and control, as well as protection measures and other actions to be taken in the event of emergencies.

In the last two years, the following actions were taken:

¹¹ There is no available information for the remaining 2.6%.

¹² The Group is working to improve its reporting systems in the commitment to continue making headway in reporting accidents of non-employee workers in new markets in future reporting periods, including those where there is legal obligation of reporting this information by the supplier.

¹³ In the year 2022, the criteria for reporting non-employee worker accidents was updated in accordance with the requirements set out in this regard in content GRI 2-8. The information available in the Group's systems for previous years does not permit historical data to be recalculated, and it is therefore not included.

5.1.6.4. Covid-19 care

At Inditex, we endeavour to **ensure the health and safety of our people**, especially in these circumstances.

Over the course of 2022, due to the unfolding developments regarding the pandemic in the markets where the Group operates, protective measures were scaled down in accordance with local legislation and the health authorities' guidelines in

each individual market.

The necessary protocols and controls remain in place in the event of any increase in cases that may affect the health and safety of employees and other stakeholders and require further action.
